wish to serve in that additional capacity. Mr. Barnes told the board, and, as the state several weeks ago had authorized Mr. Lane as full principal of the unit in view of the fact that he had 50 teachers under his supervision, the board agreed to let the matter stand. The state is paying an increased salary to Mr. Lane for the larger principalship. The matter came up again when Mr. Barnes asked for clarification in order to write contracts with the two individuals for the coming year.

Two members of the board had to leave the meeting after the election of Miss Goforth and the Carlton offer.

Mr. Barnes reported that he had completed necessary reports and surveys and was ready to appear before the state building planning committee on the local building program. He said that he would recommend that the state group authorize the building of five or six rooms at Davidson school, on the present grounds or nearby, and an 8-room white elementary building in the north section of the city.

The board authorized Mr. Barnes to operate a six-week summer school provided there is a demand for it and authorized an 8-week band summer school provided there is sufficient demand to make the school self-supporting on a reasonable tuition basis.

Mr. Barnes announced the schedule and speakers for the commencement exercises and told the group that 101 8th graders were at Camp York on a school-sponsored, week long camping school.

### MORE ABOUT Sewage

Continued From Page One  
Called for a public meeting on the sewage matter, the session developed primarily into a discussion between Mr. Ameen and the city officials on how to proceed, with City Attorney J. B. Davis asking detailed questions concerning the Olsen Engineering report, which furnishes recommendations for building a sewage disposal system, deemed adequate for a minimum of 20 years.

Mr. Ameen pointed out that the Imhoff tank, now in use here, will not handle textile mill waste, and told the board that the City of High Point paid some \$115,000 in damages to property owners who claimed they were damaged by a defective sewage disposal system. He added that Marion will put into use in June a treatment plant of the same type recommended for Kings Mountain.

Commissioner James Layton remarked, "Many people think that we're going to ask them to spend their money to help somebody else get sewage service, but our problem is to handle sewage disposal for all the people."

According to the Olsen report, virtual raw sewage is being dumped out of the two principal disposal tanks.

The board's request for exceeding the debt limit was another step in the proposal to call a bond issue to build a sewage disposal system, estimated by the Olsen Company to cost \$600,000. All members of the board were present and all the actions were unanimous.
