

Davis Operating New Air Service In Albany, Ga.

William L. (Bill) Davis, former Kings Mountain citizen and son of Mr. and Mrs. J. R. Davis, has opened a new air service at Albany, Ga., according to a recent news account in the Albany Herald.

The story in the Georgia news-

paper follows: "A unique new air service in this area will provide Sowegans with air ambulance service, cargo flying and charter transportation for business trips.

"With a motto, 'We'll Fly Anybody Anywhere, Anytime,' William L. Davis has opened the Davis Airplane Charter Service, of which there is no comparable organization between Atlanta and Jacksonville. Mr. Davis stresses that his service operates on a 24-hour basis, for any kind of charter flight.

"Making the flights will be Mr. Davis' new five-passenger Cessna 195-B, a sleek, high-powered ship with a speed of over 160 miles per hour and altitude limit of over 16,000 feet. The Cessna is fully certified by the Civil Aeronautics Administration as a charter, ambulance and cargo ship.

"The office of Mr. Davis, who is both owner and operator of the service, is located in the north hangar at Albany Airport. The telephone number is 6605, and another number is 3619.

"Mr. Davis was in the Air Force from 1940 to 1941, and was recalled and served from 1945 to 1946. For four years during World War II he was a civilian instructor for Cadets at Darr Aero Tech, Albany. He left the Albany Air Service to open his own business. The veteran pilot has more than 3,000 hours flying time, which includes both single and multi-engine planes."

NOTICE OF SALE

Under and by virtue of the power of sale contained in a deed of trust given by Phillip Roberts and wife, Lillie Mae Roberts on the 9th day of April, 1948 to B. S. Neill, Trustee for L. C. lumber against termites? ANSWER: Timbers used for construction purposes can be protected from termite attack by impregnating them with an approved chemical wood preservative, according to State College entomologists.

Considerable protection can be had by dipping the wood in a 5 per cent solution of pentachlorophenol in a light petroleum oil for three minutes, the U. S. Department of Agriculture points out. Another, although less reliable, method consists of brushing the surface of wood with this solution, using three coats.

Several coats of heavy paint applied to exterior woodwork will give some protection. All cracks, crevices and joints between timbers should be filled with putty or plastic wood prior to painting, to keep termites out. Termites already in the wood can be killed, if the wood is movable, by placing it in a chamber heated to 150 degrees for 90 minutes or 140 degrees for

Sgt. C. C. Edens, Jr. Released From Duty

Sgt. Christopher C. Edens, Jr., 201 Parker Street, Kings Mountain, N. C., completed processing for relief from active military duty at the Separation Center, Fort Jackson, South Carolina, on Sept. 9, 1952. As a civilian Sgt. Edens will continue to serve in the active reserve of the Enlisted Reserve Corps to complete his selective service obligation.

Six Steps Listed Toward GI Loan

Six steps to a GI loan for a home, farm, or business were outlined by the Veterans Administration for the benefit of more than a million veterans who have been discharged from the armed services since the start of the Korean conflict.

The new Korean GI Bill, signed into law by the President on July 16, 1952, amends the loan guaranty section of the World War II GI Bill to include eligible veterans with service anywhere in the world since June 27, 1950. Veterans Administration regional offices across the country are now issuing certificates of loan eligibility and processing applications for loan guaranty.

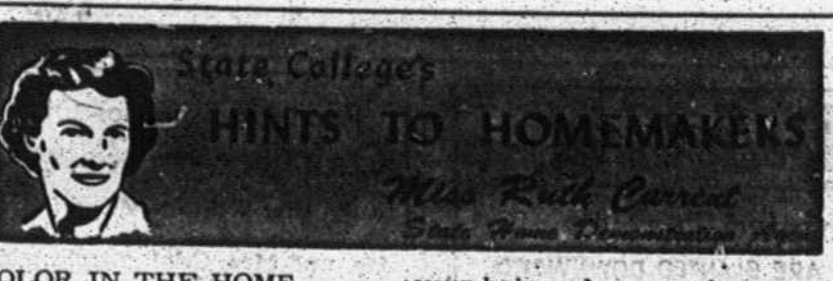

The six major steps to a GI loan are:

1. Find the property or business venture you want to buy.
2. Go to a bank, building and loan association, or other institution.
3. Present your plan and your original discharge or separation papers.
4. Property is appraised by VA-approved appraisers.
5. Certificate of reasonable value goes to the lender.
6. If application is approved, the loan is made.

In step No. 3, the original discharge or separation paper is needed to apply for a certificate of eligibility. Veterans Administration said that veterans need not rush to apply for these certificates since there is usually time to do so when the loan application is submitted.

Local Veterans Administration regional offices, however, will issue certificates of eligibility at any time upon the request of an eligible veteran.

To be eligible, veterans must have been discharged or released under conditions other than dishonorable; they must have had active military or naval service in the U. S. forces anywhere in the world at any time after June 27, 1950 and before the current emergency is declared ended, and they must have served at least 90 days unless they were discharged sooner for a service-connected disability.

COLOR IN THE HOME

Begin with color that you like. It's your skill with color that attracts attention and wins compliments. When it comes to mixing paints you must seek good painters who are experienced in mixing paints for the colors you want. Beautiful colors are on the market already mixed. First study your room. What colors already in it do you want to keep? Chances are you have something to begin with—floor covering, sofa, draperies. That can be the start or "key" to your color scheme. Your question then becomes, "What goes with this?"

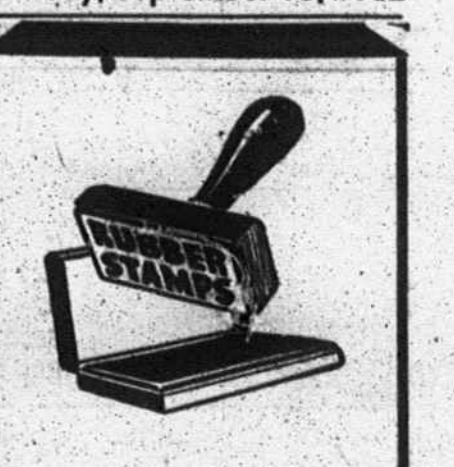

SHAMPOO THOROUGHLY

Whether you wash your hair every week, every ten days, or every two weeks, plan for a thorough shampoo. Use plenty of water, a good sudsing shampoo product, and a bath towel. Have water supply handy — both hot and cool in buckets if you don't have available running water. Fill basin with water that is comfortably hot. You can make up a suds with soap (always, a mild soap, of course, because both

your hair and your scalp are sensitive to strong soap) or you can use a special shampoo product.

Allow enough time for brushing before wetting your hair. This not only removes surface dirt but straightens out tangles which otherwise might develop into serious snarles in the washing process.

Use two sudings even when the hair is not heavy or very dirty. Rinse in fresh, clear water or with a spray and hose attached to a faucet. Rinse until your hair is free from suds, particularly at the hair line and on the crown.
