TODAY'S BIBLE VERSE

In him was life, and the life was the light of men. St. John 1:4.

New Administration

With the inauguration of a new governor and convening of a new General Assembly, North Carolina has a new administration, one pledged to progress yet also pledged to keep spending within means.

The new governor is William B. Umstead, who won hands down in November, after a rather hard Democratic primary battle against Judge Hubert Olive. There were few recriminations after the primary was over, which means that North Carolina, to all outward indications, is rather well united behind Governor Umstead, a man with a long record of service in government, and an acceptable record at that.

Those who know Mr. Umstead best think the forthcoming administration will more nearly approximate the administrations of Governors Hoey and Broughton for ease of operation and lack of fireworks, as opposed to the outgoing administration's frequent bombast.

Nevertheless, the administration of Governor Scott will be found a good one, we have no doubt. As pointed out here before, the Scott timing was right. He supported and pushed for expansion at a time of increasing state revenues. Though Scott's administration broke a record for spending, it was not embarassed. Highway revenues have jumped steadily as have other state receipts.

The new administration will most likely be more conservative than Governor Scott's, returning to the so-called progressive-conservatism of the Hoey Broughton-Cherry era. Government officials will ask for less, and most expansion moves will compromise the extremes.

Should Lift Controls

The price controls program, re-enacted by Congress after the Korean War began, has been a weak and ineffective program since its inception.

In the first instance, Mr. Truman waited too long to use the executive power he had been given. By the time it became evident to President Truman that the horean War was, in fact, a war, prices had zipped up to new highs and a variety of pressures kept popping the lid off.

It was natural that labor would demand increases after other prices had risen. The result was a continual demand, from one group or the other, for wage increases or price increases. The spiral continued upward. While some folk benefitted, or at least held even, via these spiralings, some groups were pinned heavily. Textiles, for instance, caught up quickly after the Korean buy-ing binge in mid-1950. The result was that textile firms not only could pay no higher wages, but found shorter work schedules necessary, too.

A House committee unanimously recommended last week that the controls. program be scrapped. The committee said goods were sufficient to handle the problem, and that appears to be correct. Today, if a man has the price, he can obtain almost anything.

It is one phase of federal government bureaucracy which can well be scrapped.

HOW BIG IS A BILLION? | NORTH CAROLINA FIRST SMITHFIELD HERALD IN MILES OF ROADS

Both last year and this year LINCOLN TIMES North Carolina maintained more Today most of us talk about

miles of road, surfaced and unbillions as casually as people used surfaced, than any other state in to talk about thousands. And the union. The total, say figures that's largely a result of the given out by the State Highway given out by the State Highway trend of government in recent Department, was 66,592. Of these, years. Our national debt is a-48,519 were surfaced. round \$260,000,000,000, and an-We have so often been obliged nual spending has been rolling to point out that all too often this merrily along at an \$80,000,000,state is near the bottom in vari- 000 rate. So figures large enough ous columns of statistics that it to tax the imagination of a firstis a pleasure to chronicle this class mathematician are common-'first" for North Carolina, place in public discussion.

There are other interesting figures to think over. Governor Scott points out in his end-of-the-year solitary billion amounts to should In view of this, a Reader's Di-

Among the chief issues facing the legislature will be liquor, teacher pay, school construction, and primary highways. As usual, all will be connected with the prime business of adopting a budget which will not provide more spending than there is income.

As usual, there will be plenty of legislation for the new administration to handle.

Car Inspections

Most folk were mighty, mighty glad when the state's car inspection program was scrapped a few years back. The program had a short life. The reason was lousy administration, particularly in populous areas, and there was such a hue and cry of complaint the General Assembly voted it into limbo.

Ever since, there has been a call from some groups for another car inspection program. They point to the accident total in the state and infer that faulty autos cause them.

Some accidents, undoubtedly, are caused because the brakes fail to act at a crucial moment, or because of other mechanical failure.

But by far the greatest number of accidents, in other states as well as in North Carolina, occur due to driver error, commonly known as carelessness. in one of its several forms.

Actually, the death rate from auto accidents has come down in North Carolina, both in total number of deaths and in number of accidents per miles driven. At a time when the federal government, supposedly, is launching a downwith - bureaucracy movement, why should North Carolina add to hers?

Other matters to attend to now are purchase of license tags for automobiles. Deadline for using the old-model tags is January 31. The same rule applies on city license tags

Mountain's several financial institutions shows the total of dividends or interest paid on savings accounts increasing. It means that there are some smart people around savings regularly a portion of their income in order that they may someday buy a new car, build a house, educate the boy or, if worse comes to worse, handle the rainy day problem. It's always good business to save a portion of earnings and thus it is good news to read that savings deposits here are continually increasing.

The county has a stepped-up quota for selective service pre-induction examinations during January, indicative of possible larger calls to come on final induction of men into the armed services. The draft process is a sharp reminder of the continuing war in Korea, as well as the continuing "cold war" generally. It is a reminder, too, that the biggest problem facing the new Eisenhower administration is the settlement of the Korean conflict. Odds are that the war is going to be expanded, in one direction or another, with an effort to complete the sad business. In other words, many people expect the Korean War to get worse before it gets better.

grand prize winner, and to the several division winners in the Christmas decorated door contest which was sponsored by the Garden Club council, in cooperation with the First National Bank. Much interest in the contest was evidenced, and this interest meant a greater spreading of the Christmas spirit, through the decorations, all over the community.

Now is the time to list your property early will save themselves time and trouble.

Cur congratulations to D. E. (Dickie)

I have not received mine yet, and am operating off a borrowed one. However, it is proving to be very interesting. n-c Not only do I find that

several business firms are rolling out the magic carpet on my birthday (as well as other listed birthdays), but there is other interesting information contained in it as well. If in doubt when the civic club meets again, just look at the calendar. In this way the wives of Lions and Jaycees will have no trouble at all scheduling their spouses' vacant Tuesdays. (The Kiwanians are real he-man, taking every Thursday night out with the boys, However, I note that the Kiwanians take the ladyfolk along more than the other club members do, and the weekly getting out may be the reason.) n.c

I am not sure that the ladyfolk are going to like this calendar too much in some respects. While it will provide plenty of excuse for timely hints about approaching anniversaries, it will also provide reminders of passing birthdays and consequent speculation about ages, etc. Can't you imagine someone saying, "Oh, she'll never see 30 again!

n-c

I find that the 1953 calendar lists three Black Cat days, or Fridays, the thirteenth. They occur in February, March and November. The birthday calendar lists Glee E. Bridges, C. E. Joly and Clarence Spratt as February 13 arrivals, Ben Horton, Mrs. Kathryn Huffstickler and Kay Mauney as March 13 arrivals, and has a blank on November 13. Due to the usual superstition connected with Fridays, the 13th, I would advise that all these folk plan to spend the day in bed.

n-c

All this information makes the Jaycee Birthday Calendar a quite unusual and news filled one. In addition to all the listed birthdays, anniversaries, and other information, the back page (behind December) gives the proper flower and birthstone for each month in the year, plus the type material proper for a wedding anniversary gift. After year No. 10, I find, it's impossible to get out cheaply.

Other 1953 calendar notes: Easter comes on the first Sunday in April, the fifth, and Independence Day lands smackdab on a Saturday, Christmas will fall on Friday.

I haven't checked closely, but I do not think, in this normal Mo, is on a visit at his home in 365-day year, that anything particularly unusual is connected with the 1953 calendar. In event
