**Clothing Hints Advised
By Extension Specialist**

"Good clothing care can be as easy as saying your ABC's," according to Mary Em Lee, State college extension specialist in clothing.

Good clothing care merely implies the kind of simple care that everyone can easily put into practice at home.

Air your clothes frequently and properly. Moths and other pests hate fresh air — so air makes a good preventative. Airing also relaxes fabrics and banishes ordinary wrinkles and creases. Clean clothes also give longer service since moths rarely attack clean garments.

Quick and direct attention is needed for clothes that get wet, and that's a good point to bear in mind this time of the year. Miss Lee cautions against draping a damp coat or dress over a radiator or hanging it in front of a fire. The fabric will be dried and actually get out of shape if you do. Instead, keep it in a cool dry place and away from other clothes. When dry, brush the fabric with the nap, not against it.

It will be to your advantage to have a knowledge of spot and stain removal. Know the stain or spot and follow directions for its removal. Fresh stains are much more easily removed than old ones. Avoid application of heat on any spot — the heat may set it.

The way you put on and take off your clothes can prolong their life. Don't struggle and push yourself into suits and coats. You will strain the seams and stretch the fabrics. After each wearing, a suit or coat needs a brisk brushing. If dust and dirt is allowed to remain, the fabric will be damaged and the finish will become dull.

ARTHRITIS?

I have been wonderfully blessed in being restored to active life after being crippled in nearly every joint in my body and with muscular soreness from head to foot. I had Rheumatoid Arthritis and other forms of Rheumatism, hands deformed and my ankles were set.

Limited space prohibits telling you more here but if you will write me I will reply at once and tell you how I received this wonderful relief.
