

Window-Fall Hurt Season Here Again

Open season for falling out of windows is here again says the Institute For Safer Living of the American Mutual Liability Insurance Company.

Alarmed by more than 200,000 injuries occurring annually from this cause — most of which happen to children under five and which reach peak frequency between May and September, the Institute warns parents to exercise extra care during these days when windows are open most of the time.

This type of home accident involving children usually happens because parents either overlook the hazard or completely discount the possibility of their youngsters falling out of the window. They would do well to recognize the frequency of mishap and take steps to prevent it in their home.

The Institute advises: Locate furniture away from windows so that children cannot climb close to sills.

Never position a crib or child's bed next to an open window.

Have windows screened for extra protection.

Never leave children unattended in upstairs rooms where windows are open or can be opened.

Never leave a child unattended on an upstairs open porch.

March production of total non-fat dry milk solids was the highest for the month in 20 years on record — 131,650,000 pounds, 18 per cent above a year earlier.

SUCCEEDS FORSYTHE — Don E. Engdahl, of Spokane, Wash., a-bove, was elected president of Kiwanis International recently, succeeding Donald T. Forsythe.

Engdahl Named Kiwanis Head

Delegates attending the 39th annual convention of Kiwanis International at Miami, Florida, elected a prominent manufacturer from Spokane, Washington to head the organization in the year ahead.

Officers of the Kings Mountain Kiwanis club have been informed that Don E. Engdahl, president of the Spokane Sash and Door Company, would succeed Donald T. Forsythe, of Carvonia International, which is now comprised of more than 3,800 clubs throughout the United States, Canada, Alaska, Hawaii, and the Yukon Territory.

President-Elect Engdahl won the Spokane Junior Chamber of Commerce Award for the city's most outstanding citizen under 35 in 1944. The following year, he was chairman of a committee which secured a \$3,000,000 school bond appropriation. He now is a member of the Chamber of Commerce as well as many other civic and philanthropic organizations. Mr. Engdahl is a graduate of Syracuse University, where he majored in business administration.

A Kiwanian since 1933, Mr. Engdahl has served as club president, lieutenant governor, governor of the Pacific Northwest District, a member of the International Committee on Business Standards, and chairman of the International Committee on New Club Building for the United States. Last year he was treasurer of Kiwanis International. Preceding his office as treasurer, he served as a trustee for two two-year terms from 1949 to 1953.

Delegates to the Miami convention, which drew an adult attendance exceeding 10,000 men and women from all sections of Canada and the United States, also elected two vice presidents, a treasurer, and six trustees.

Vice presidents are Jackson A. Roney, Indianapolis, Indiana, and Ewart G. MacPherson, Winnipeg, Manitoba. R. Warren Graffam, of Pittsburgh, Pennsylvania, was elected treasurer.

Trustees elected for two years include Kenneth Loheed, Toronto, Ontario; Joseph Tally, Jr., Fayetteville, North Carolina; I. R. Witthuhn, Milwaukee, Wisconsin; Da-

GARDEN TIME

Some of you sweet corn growers may be looking forward to the satisfaction and joy that will be yours when you sink your teeth in the first tender ears.

Perhaps the corn ear worms are also looking forward to that time — and they usually get there first. However, they can be effectively controlled with very little trouble. For small gardens it is probably sufficient and easiest to dust the silks of the corn with 5 per cent DDT. The dust should be applied directly to the silks when about three-fourths of the silks are showing and again when a few of them begin to turn brown.

The moth lays the eggs on the silks and when they hatch out the small corn ear worm feeds there before he eats into the ear itself. For large plantings a power sprayer should be used and a DDT-mineral oil emulsion is recommended by our entomologists. This spray has been found to be very effective for the control of the ear worm. There is a special self-propelled sprayer designed for spraying six rows of corn at a time. This has been used successfully by commercial growers in Florida and Virginia.

Man Under Bond In Wreck Case

Fred Davis, of route 3, Gastonia, was arrested last Thursday night by State Highway Patrolman O. R. McKinney and charged with aiding and abetting in reckless driving and maintaining improper license plates. The arrest was made as a result of a two-car accident occurring around 8:30 p. m. on the Cherryville highway approximately two miles from the Kings Mountain city limits.

According to Patrolman McKinney, a 1941 Chevrolet two-door car in which Davis said he was a passenger, struck the left rear of a 1950 Chevrolet operated by Miss Louise Kiser. Miss Kiser lost control of her car and turned over. The driver of the 1941 Chevrolet also lost control and apparently turned over three times.

Miss Kiser, who received minor injuries, was taken to the Kings Mountain hospital for first aid. Bond of \$300 had not been made by Davis Monday.

Property damage was estimated at \$1,000.
