4 HOUR WRECKER SERVICE

Advanced aircraft-type valves

A new valve train design permits each valve to function independently-as in modern aircraft engines. Valve action is more positive.

Floating oil intake ... full-pressure lubrication

New floating oil intake selects the cleanest oil for engine lubrication. Full-pressure lubrication provides positive protection.

*V8 standard in the new L.C.F. models, an extra-cost option in all others except Forward-Control models.
