

HERALD MYSTERY FARM NO. 42—Can you identify the mystery farm? Pictured is Mystery Farm No. 42 which readers are being asked to identify. Identification may be made by telephoning the Herald office (Phones No. 167 or 283) by the 6 p. m. Friday deadline. Four complimentary theatre tickets good for admission to "Soldier of Fortune" at the Joy Theatre through June 29 will be given

to readers via a Saturday morning drawing. The operator or owner of the farm is asked to visit at the newspaper office, make identification of his farm, and receive an enlarged aerial photograph of his properties. None knows the identity of the farms, not even the photographers. (Photo by Zekan-Robbins Co., Harlan, Iowa.)

Minerals Museum Dedicated Friday At Gillespie Gap; Moomaw Attends

The story of North Carolina's rich mineral resources and their interesting uses is presented in a series of colorful exhibits designed and constructed at the National Park Service's Museum Laboratory in Washington, D. C., and now on display in the new museum of North Carolina Minerals at Gillespie Gap on the North Carolina portion of the Blue Ridge Parkway, acting secretary of the Interior Clarence A. Davis announced today.

The new minerals museum was dedicated on Friday with Governor Hodges as the principal speaker. Conrad L. Wirth, director of the National Park Service was also present.

Ben Moomaw, superintendent of Kings Mountain National Military Park, attended along with Paul Lancaster of Kings Mountain Mica Company. The two Kings Mountain firms provided samples of local minerals for display at the new unit.

About a year ago, funds were provided by the State of North Carolina for construction of a handsome stone museum building at Gillespie Gap. This site was selected because here the Parkway skirts the Spruce Pine area, one of the world's most highly mineralized regions.

Funds were also provided by the State for preparation of the museum exhibits by the National Park Service. Mineral specimens for the exhibits and study collections of the museum were donated by mining companies, mineral collectors, and public spirited individuals. Many industrial concerns gave examples of a wide variety of end products in which North Carolina minerals are used. The State Department of Conservation and Development cooperated closely with the National Park Service in planning and developing the museum. A Mineral Museum Advisory committee which included leading citizens of Spruce Pine, was active in sponsoring the project and gave much help to the National Park Service in gathering the specimens and detailed information needed for the museum.

Among the rare and valuable objects in the exhibits is a fine emerald mined near the museum site. A jasper ware vase made in 1777 by Josiah Wedgwood, about

one-quarter of these have economic value and from 40 to 50 have been, or are now, produced commercially.

Another exhibit displays the surprising variety of gem stones occurring in the State, and an exhibit on gold points out that until 1849 North Carolina was the main gold producing area in the United States. This case also contains some of the unofficial, but widely accepted gold coins minted between 1831 and 1857 by a German immigrant family named Bechtler near Rutherfordton, N. C. Bechtler coins always assayed at least as high as official United States coinage.

The geologic origin of North Carolina's minerals is explained in other exhibits.

Visitors who wish to see how widely minerals are distributed in the State and what minerals occur near their homes may operate the battery of switches on an electric map showing the principal mineral deposits of North Carolina. Another series of exhibits allows visitors to see how several kinds of minerals react to ultra-violet light. By pressing

buttons they can view the same specimens first under ordinary light and then as they fluoresce under the ultra-violet rays. These exhibits have special viewing tubes for children.

Museum technicians in the National Park Service's Museum Laboratory in Washington are setting up a special display of radioactive minerals of which North Carolina has 13 kinds. Specimens mounted on a disc may be moved past a Geiger counter so the visitor may read the relative strength radiation from each sample.

Another display deals with the great 300-inch telescope mirror for the Mount Palomar Observatory, which was made with quartz mined near the museum site.

The State provided \$75,000 for constructing the museum building and preparing the exhibits.

For more milk value in foods, add whole or non-fat dry milk to the fluid milk used in soups, mashed potatoes, cereals, and beverages. One half cup of dry milk added to a pint of fluid milk makes the food twice as rich in milk value as it is when fluid milk alone is used.

The family of Mrs. Lona E. Osborne wish to express their appreciation for the kindness and sympathy of their many friends during the loss of their mother.

CARDS OF THANKS

The family of Mrs. Lona E. Osborne wish to express their appreciation for the kindness and sympathy of their many friends during the loss of their mother.

MYSTERY FARM STUMPS READERS — Pictured is last week's mystery farm which has not yet been identified. It is the second farm which area readers have had difficulty in identifying since the 52-week farm feature began. Readers may

identify the farm by telephoning the newspaper office, and the owner or operator of the farm may identify his property and receive an enlarged aerial photograph of his farm.

I'm Pocketing My Savings From The Use Of OIL HEAT

You see, Oil Heat is the most economic automatic heat available, besides being the best in so many other ways . . . and substantial savings mount up every month. If you are buying a new house or converting your present heating system, be sure to get safe, economical oil heat. Its lower upkeep puts a higher value on your home.

OIL HEAT COSTS LESS!

CLEVELAND OIL DEALERS ASSOCIATION

KINGS MTN. FARM CENTER

takes pleasure in announcing the appointment of

Mr. Lloyd D. (Buck) Early

as salesman

Mr. Early began his new duties on Monday after serving the Ralston-Purina Charlotte Plant for six years.

We invite Mr. Early's friends to visit him at our store and also an invitation to others to drop in and meet him.

Grace Revival To Start Sunday

Revival services will be conducted at the Grace Methodist church, beginning Sunday, and continuing through July 3 with services nightly at 7:30.

The pastor, William C. Sides, Jr., will be the preacher for the revival series.

The Rev. Clyde L. Collins, pastor of McAdenville Methodist church, will lead the congregational singing.

Vacation-Bound? Inform Police

Is a vacation in your immediate future?

If so, Chief of Police Hugh A. Logan, Jr., noted this week, several precautions should be taken to foil any would-be burglars.

Included are: 1) Notify the Police department as to when you and your family are leaving and when you are returning to enable police to keep an extra vigil on your home. 2) Call the milkman and paper boy and stop deliveries. An accumulation of such items is an open advertisement to thieves, the chief said.

Police department phone number is 254.

Who's showing its heels to the high-priced cars? The Motoramic Chevrolet! The other low-priced cars aren't even in the running!

..and you're gone!

IT'S EXCITEMENT ON WHEELS!

The light turns green . . . you nudge the accelerator ever so gently . . . and you're gone! That's the way it is in the Motoramic Chevrolet. When your toe says "Let's go," a hoofful of high-compression horsepower explodes into action, sweeping you away from traffic tangles, making short work of steep hills, putting new fun in your driving life!

RECORD-SMASHING ACTION!

That's what you get with Chevrolet's new "Turbo-Fire V8"! In the recent NASCAR* stock car competition at Daytona Beach, Chevrolet showed its heels to all other low-priced cars. In the one-mile straightaway run, the first two cars—and six of the first ten—were Chevrolets! And in acceleration runs from a standing start against all comers, Chevrolet beat all low-priced cars—and every high-priced car except one!

Chevrolet's two new "Blue-Flame" sixes have plenty of size, too. In fact, they're the highest powered sixes in the low-price field!

TREAT YOURSELF TO ADVENTURE

Come in and drive the car that is making 1955 famous! That's the only way you'll discover all the exciting reasons why Chevrolet's stealing the thunder from the high-priced cars!

*National Association for Stock Car Auto Racing.

The Bel Air Sport Coupe. You'll find your favorite model among Chevrolet's complete line of Fisher Body beauties.

Combine your new Chevrolet purchase with your vacation plans!

Order a new Chevrolet through us, then pick it up at the plant in Flint, Michigan, see Chevrolets built, if you like, and drive yours home. Chances are, you'll save a substantial share of your vacation travel cost!
