Social Security Manager Notes New Features

In My last article I told of self-employed lawyers, dentists and other professional people now covered by social security. Under the 1956 amendments to the law, their earnings started to count towards old-age and survivors insurance protection for themselves and their families as of January 1, 1956. Naturally, they want to know how long it will take them to become insured under the law.

To become insured under social security a person must have been in work covered by the law for a specified length of time. The cause his work was not covered amount of work required is measured in "quarters of coverage" which, in a general way, corresponds with a calendar quarter of work. A self-employed person gets four quarters of coverage for a year which he has \$400 or more in net earnings from self-employment. The usual requirements for becoming insured are one quarter of coverage out of every two calendar quarters elapsing after 1950, provided there are at least six quarters of coverage. Under the amended law, a person who works continuously after 1955 can become insured with fewer quarters of coverage. This change in the law permits self-employed professionals and others brought under social security as of the beginning of this year to disregard their years of non-coverage in acquiring an insured status under social security.

For example, Dr. Jones, a self-employed dentist, is now age 63. He had never been in work covered by social security before January 1, 1956. Dr. Jones will reach 65 in 1958—two years after his self-employment first became covered under the amended law. If his birthday is before April first, he will need to have a quarter of coverage in each of the 8 quarters elapsing after 1955 and up to the quarter in which he reaches 65. If all these quarters of coverage, he will be insured for old-age benefits if he elects to retire at that time.

If Dr. Jones' birthday occurs in the second calendar quarter of the year, he will need 9 quarters of coverage before then; if he reaches 65 in the 3rd quarter of 1958, he will need 10 quarters of coverage before that time. If his birthday is after the end of September, 11 quarters of coverage up to that time will be required. For death benefit purposes, 16.43

however, Dr. Jones would be insured as early as April 1957 if all 6 of the quarters elapsing after 1955 and through the second quarter of 1957 are quarters of coverage. He would not then be insured for retirement benefits, as he would not yet be 65, but if he should die at that time, survivors payments could be made to certain dependents, as he would have met the minimum requirement of six quarters of coverage. Ordinarily, benefit amounts are based on a person's average earnings in employment or self-employment covered by the law af-

ter 1950. If all the time elapsing after 1950 were used in figuring this average, self-employed professionals newly brought under social security would have five years in which these earnings were not covered and would count against them. The amended law permits the dropping of these five years. A self-employed dentist, lawyer, or any other person whose work was first covered by social security this year, will not have his average earnings reduced when he qualifies for benefits because his work was not covered in the years 1951 through 1955.
