Bible Comment: **Matthew Contrasts** Christian and

Worldly Ways FOUR verses of the 20th chapter of Matthew present as vividly and definitely as could be stated the Christian ideal and way of life in contrast with the way of the world. The contrast is so unmistakable it is amazing so many have failed to profit by

Even some professing Christians and a few of those associ-ated with the church have been more concerned about pursuing the way of the world in personal ambition for power or material reward rather than in consecrating themselves to the Christian

ministry of service.

"The rulers of the Gentiles," said Jesus, "lord it over them, and their great ones exercise authority over them."

Is not that an exact picture of just what has been happening in all countries throughout the ages? To attain to power and to exercise authority has been the goal of men of great abilities and their petty imitators. Jesus says that this is not the

Christian way. In the Kingdom that He came to establish, greatness is not reckoned by lordship and authority, but by the meas-ure of one's capacity and willing-Whosoever would be first in

this Kingdom is the one who most truly serves his fellowmen, and first of all in the Kingdom is Jesus Himself, "who came not to be ministered unto, but to minister, and to give His life a ransom for many.' Repeatedly, both by precep

and example, Jesus sought to en force this lesson concerning tru

Early Grain Seeding Shows More Profits

A North Carolina farmer who "puts off" seeding grain often finds this one bad practice costs him profit from his crop.

This is the opinion of Field Crops Extension Specialist George E. Spain at North Carolina State College, who believes that, "farmers may be more lax in the application of the principle of planting on time than in some others."

Early cold spells and heaving small grain stands in half, says Spain. He believes that every ef. fort should be made to plant grain soon enough for a good root system and plant growth to develop before these conditions arise. Experiments show that better yields may be expected by seeding with these recommended dates:

In the Coastal Plain, plant wheat between October 25 and November 10 and oats and barley between October 10-30. In the Piedmont, plant wheat between October 10-30 and oats and barley between October 1-25. In the mountains, plant wheat between September 20 and October 10 proving slowly. and oats and barley between September 20 and October 10 also.

Spain believes that now is the time for farmers to plan for even higher grain yields in 1956-57.
