

NOTICE OF SALE

Under and by virtue of the power of sale contained in a deed of trust given by Winfred L. Hope and Wife, Martha F. Hope, dated 9th of September, 1956 now on record in the Office of the Register of Deeds for Cleveland County in book 454 at page 274, said deed of trust having been given to the undersigned as Trustee to secure the indebtedness therein mentioned, and default having made in the payment of same and at the request of the Home Building and Loan Association, I will sell for cash at the courthouse door in Shelby, Cleveland County, North Carolina on MONDAY, OCTOBER 8, 1956 at 10:00 o'clock a. m. or within legal hours, the following described real estate:

Being Lot No. 63 in the Cora Mills Subdivision of the property of Textiles, Incorporated as shown on plat thereof made by Charles S. Kirby, Surveyor, a copy of which plat is filed in the Office of the Register of Deeds of Cleveland County, North Carolina, in plat book 2 at page 95, to which reference is hereby made for a full and complete description of said lot by metes and bounds. Being more fully described as follows:

BEGINNING at a stake in the western margin of 15 foot alley; thence N. 47 deg. 53 min. E. 76.5 feet with the western margin of said alley to a stake; thence S. 72 deg. 07 min. E. 83.95 feet to a stake; thence S. 17 deg. 53 min. W. 71.5 feet to a stake; thence N. 72 deg. 07 min. W. 90.4 feet to a stake, the point of BEGINNING.

Being the same land conveyed by Bennie F. Rayfield and wife, to J. L. Foster and wife, by deed dated 19th of January, 1950 as will appear on record in the Office of the Register of Deeds for Cleveland County in book 6-D at page 195.

This the 5th day of September, 1956.

B. S. Neill, Trustee
Davis and White, Attorneys
9:20-10:4

Large Lithium Block Highlighted In Recent State Geology Report

RALEIGH — Deposits of lithium minerals in North Carolina constitute the largest block of economically recoverable reserves known in the Western Hemisphere and have been estimated to represent nearly 93 percent of the total domestic reserves of this highly strategic mineral.

This statement is one of the highlights in a study of North Carolina's lithium resources by Sam D. Broadhurst, assistant State geologist, for the Department of Conservation and Development.

Located favorably for mining, processing, and marketing, the lithium deposits, Broadhurst states, provide the United States with a well protected major source of supply.

The booklet containing Broadhurst's findings may be obtained by writing Dr. J. J. Stuckey, State Geologist, Division of Mineral Resources, Department of Conservation and Development, Education Building, Raleigh.

It is entitled "Lithium Resources of North Carolina."

Lithium has many uses. A major portion of the current production is used in the preparation of ceramic products and all-purpose greases. Increasing amounts are being consumed in the development of nuclear energy.

Lithium is also an ingredient in fuels now being tested for rockets and similar types of propulsion equipment, Broadhurst states. Other uses include air conditioning, organic synthesis, hydrogen generation, brazing and welding, metallurgy, alkaline storage batteries, dry-cell batteries, cosmetics, pharmaceuticals, and photography.

There are four principal localities in North Carolina in which lithium minerals occur. They are: the Kings Mountain mining district; southeastern Alexander county; near Spruce Pine in Mitchell county; and in south-central Warren county.

Estimated reserves of readily recoverable lithium ore are said by Broadhurst to be sufficient to maintain the current rate of production of more than 75 years.

"The reserve estimates are conservative and are expected to increase as development work increases," Broadhurst adds.

There are two large plants for the recovery of lithium-bearing ores in the state. One is the Foote Mineral Company at Kings Mountain, and the other is the Lithium Corporation of America near Bessemer City.

Keen interest continues to be manifested in recovery of more lithium-bearing ores in what is known to geologists as the tin-spodumene belt in this State.

MOVE OVER, LUCIFER! For the first time in history, oil has been brought from more than four miles underground. The oil shows were from a 2.4 million dollar wildcat well sunk to a total depth of 22,570 feet in Plaquemine Parish, Louisiana.

Oil men testing the well recovered mud and oil from rock 21,465 feet deep, smashing the previous producing depth record by 3,500 feet. This well the deepest man-made hole in the world, is an example of the perseverance which oil men exercise to keep ahead of America's demand for oil products.

Korean Vets GI Insurance Deadline Near

December 31, 1956, will have more significance for many Korea veterans than merely the end of the year. For veterans discharged after September 1, 1956, the last day they may apply for the low cost government insurance will be December 31, 1956. After January 1, 1957, the Veterans Administration will not issue any new government insurance because of a new law enacted by Congress and signed by President Eisenhower, George C. Warlick of the Gastonia VA Office stated today. Sale of new insurance after December 31, 1956 applies only to non-disabled veterans. Mr. Warlick said, Veterans who incurred a disability while serving in the armed forces have one year from the day the VA notifies them they have established disability in which to apply for the insurance.

The new law does not cancel insurance issued before January 1, 1957. Therefore, veterans may continue government insurance bought by December 31, 1956. Heretofore, veterans were protected by the Indemnity Act of 1951 for 120 days after separation from the armed forces. From now on they will have less and less free protection as December 31, 1956 draws nearer. Mr. Warlick emphasized, since all free coverage against death ends on that date. Mr. Warlick pointed out that veterans who have been released since September 1, 1956, or who are released between now and December 31, 1956 may apply for government insurance and the insurance would become effective as of January 1, 1957. This will give them all the free time they are entitled to, but insure that the moment the indemnity protection ends, their insurance will cover them.

Application may be filed and premium for one month at least must accompany it. The next premium in such instance will not be due until February 1, 1957. Premiums may be paid to the VA monthly, quarterly, semi-annually, or annually. The VA recommends that payments be made annually or semi-annually. Mr. Warlick said, This saves the veteran and the VA is saved considerable clerical expense, which in turn saves the tax payer money. However, if it is not convenient to pay the larger amount, the veteran may make monthly payments in small amounts. As indication that Korea veterans are concerned for those who would be adversely affected by the veteran's death, Mr. Warlick stated today he has prepared applications since January 1, 1956 totaling more than \$1,200,000, and he expects to exceed \$1,500,000 before sale of insurance stops on December 31, 1956.

Information about government insurance or assistance in filing for it, changing beneficiaries, etc., is available in the VA Office located on the second floor of the Gastonia Post Office. Mr. Warlick's office is open from 8 a. m. until 4:45 p. m. Mondays thru Fridays.

NROTC Tests Are Scheduled

The 11th annual national competitive examinations for the Naval Reserve Officers Training Corps will be given interested high school seniors on Decem-

ber 8th, according to a recent release by Chief of Naval Personnel, Vice Admiral James A. Holloway, Jr.

Application forms are now available and must be received before November 17, he added.

Designed to supplement the officer output of the Naval Academy, the NROTC program makes it possible for a young man to earn a commission while studying at the civilian college of his choice which has an NROTC unit.

Under this program, all tuition, fees and books are furnished by the Navy, and in addition, the student receives monthly pay of \$50 a month or \$600 a year.

Students receiving appointments as midshipmen, USNR, under the program are sent on summer training cruises with the fleet, during which they visit European, Caribbean, South America and Canadian ports for shore leave.

Upon graduation, the NROTC midshipmen is commissioned as ensign in the Navy or Second lieutenant in the Marine Corp before being ordered to active duty.

Application forms are available at high schools or at Naval Recruiting Stations.

GARDEN TIME ROBERT SCHMIDT N.C. STATE COLLEGE

With the coming of fall weather, we must prepare to harvest and care for our sweet potato crop. The sweet potato, a tropical plant, will continue to grow until frost kills the vines. However, they may be dug as soon as the roots have reached a desirable size. It is safer to dig them before frost, for if the stems are exposed, they may be damaged by the cold, and the roots will not keep well in storage.

Sweet potatoes should be dug carefully to prevent bruising or cutting them unnecessarily. A bad bruise will cause a hard spot when the potato is cured, or it may allow disease to enter the root. It is best to grade in the field. Carefully pack the marketable potatoes in bushel tub baskets or slatted crates in which they will be stored. The culls should be used at once or disposed of. It is not advisable to store culls with the good potatoes.

If you grow only a few potatoes for your own use, a warm basement or vacant room may provide

suitable storage. For the first 10 to 15 days, a curing temperature of about 85 degrees F. should be maintained. After that time a temperature of 55 to 60 degrees is best.

For the gardener who also wishes to sell a few bushels of potatoes, we recommend that he build a small storage house such as one designed by the Department of Horticulture and Agricultural Engineering, which will hold 64 bushel baskets of potatoes. It is heated by electricity and controlled by a thermostat so that there is little attention needed in its operation. Plans may be obtained from the Agricultural Extension Service, N. C. State College, Raleigh, N. C.

Once the potatoes are placed in storage, they should not be handled or disturbed until you are ready to remove them for use or for market. Any handling of the potatoes in storage often will cause many of them to rot. If stored in baskets or crates, any desired number of baskets may be removed at any time without disturbing the others. It will be necessary to regrade all potatoes taken from storage for market.

STATE COLLEGE Hints To Homemakers

MAKE FARM SAFETY SIGNS — Why not "do-it-yourself," and make your own farm safety signs. Place simple, neat safety signs near danger spots on the farm. Children will enjoy helping to make them and it's a good handicraft for the whole family. Here are a few suggestions—you will have others to fit your own farm safety needs:

No Smoking In The Barn Keep Pitchforks Here Alert Today — Alive Tomorrow Work Safely — Play Safely. An Ounce Of Prevention Is Worth A Pound Of Cure

SAFETY HEALTH RULES — Try these health safety rules suggested by the National Safety Council.

Go less, sleep more. Ride Less, walk more. Talk less, praise more. Scold less, praise more. Waste less, give more. Eat less, chew more. Worry less, laugh more.

ASTHMATICS! Want simple, effective relief from choking, racking bronchial asthma spasms? Get genuine Breatheray—see what you've been missing! There's no substitute for original Breatheray inhalant and nebulizer set. Get comfort by breathing! Guaranteed! Kings Mtn. Drug Co.
