

CAREFUL WITH THAT GASOLINE!

USE A SAFETY GASOLINE CAN... FILL TANK ONLY WHEN ENGINE IS COOL. AND KEEP HANDS AND FEET AWAY FROM BLADE WHEN MOWER IS IN USE!

ALL KINDS OF LEATHER CARE DURING HOT DAYS—Use saddle soap to clean leather upholstery or leather surfaces on tables, advise Extension home furnishings specialists. To clean leather simply dampen a cloth or sponge in warm water, wring it out, then rub it over saddle soap. Rub the leather briskly. Then rub with another moist but clean cloth without soap. Rub dry with a soft cloth. Any gloss which disappears will be restored by friction of the last rubbing.

The specialists warn against using furniture polishes, oils or varnishes on leather because these preparations frequently contain solvents that cause leather to become sticky.

If leather appears to be drying out, rub it with a small amount of a leather dressing with the fingers and palm of the hand. In humid weather mildews is easily removed. Keep leather as clean as possible and dry. Wipe mildew off (with a damp cloth) promptly, then dry with an electric fan. Leather shoes, handbags and all sorts of book-bindings as well as leather upholstery need to be kept in a dry place in summer to prevent mildew.

KEEP HOT THINGS HOT, COLD THINGS COLD—A hot water bottle will stay hot, or an ice bag cold, longer if you wrap it in foil. To delay melting ice cubes removed from tray, place cubes in mixing bowl, cover tightly with foil.
