TODAY'S BIBLE VERSE

For so is the will of God, that with well doing ye may put to silence the ignorance of foolish men I Peter 2:15.

Hardly Equitable

Tax listing officials, for years, have commented on the questionable tax listing yardstick of private personal property, with the exception of automobiles, such as furniture, television sets, lawn mowers, clothing and similar items.

Glee A. Bridges, who handled the chore for the city this year and who was close to the situation during his several terms as mayor, says he saw numerous instances where uninitiated newcomers would put down comparatively outlandish figures for these items, whereas a veteran citizen would figure his loaded wardrobe at \$50 to \$75.

Mercantile and industrial inventories, as well as fixtures and equipment come close to being listed by the same yardstick, as do autos, where the auto dealers' wholesale "bluebook" gives a current value by exact model.

Apparently, there would be one avenue to establish equity, by the elimination of all except automobiles in the listing requirement for individuals.

Conversely, Mr. Bridges, new president of the Chamber of Commerce, and Floyd Farris, president of the Shelby Chamber of Commerce, speculate that a fairer method would be a percentage of the value of the residence of the taxpayer - - in event the taxing authority felt it unwise to eliminate private personal property of the dog and furniture

It is a plan followed in some other states.

What about the fellow who rents? The formula there would be the same percentage of the resident's annual rent, or in turn, same percentage of the value of the residence as assessed to the land-

Yet another questionable taxing yardstick, from both county and municipal standpoints, is the privilege license tax. These agencies (and the state, too) extract taxes on businesses, desirable and needed assets to any community and among the larger ad valorem taxpayers, for the "privilege" of doing business in the community.

Again, the worse part is the yardstick The firm grossing \$50,000 per year often pays close to the annual amount of a firm grossing a half-million.

Additionally, the privilege license tax doesn't return a great amount of revenue and is worrisome and costly to collect, particular those taxes applying to peddlers and other transients.

The other side of the coin, of course, is that taxing governmental agencies never have enough income to satisfy all

However, it is incumbent on the taxing agencies to eliminate inequities where at all possible.

The city is moving to conform to Local Government Commission instruction in calling for payment gas bonds within the limits of its redemption fund. The system has done well in the profit category, as is indicated by annual reports and last month's record billings. Of course, a sizeable portion of the redemption fund accrued from the fact the city enjoyed a very low bid on installation of the distribution system. The maximum four percent premium payable on bonds called won't be unbearable, for interest for future years will be eliminated.

Friday is new-tag day for all North Carolina motorists, who must show the '62 model on their autos on pain of pain in court. The same applies to Kings Mountain car owners on their 1962 city tags.

A best bow to the newly-elected officers of the Kings Mountain high school Student Participation organization, who are: Paul Smith, president; Donnie Freeman, vice-president; and Diane Roberts, secretary.

MARTIN'S MEDICINE

By Murtin Harmon

ngredients: bits of new visdom, humor, and comme Directions: Take weekly, possible, but avoid

The medicinal library was enhanced twice last week.

On Tuesday, Bill Sharpe, editor of State Magazine paid call and left a copy of his "A New Geography of North Carolina, Volume III", the latest of four projected volumes, de signed to include all of North Carolina's 100 counties

Volume III includes 26 counties, Cleveland among them, bringing to 72 the coverage of the three, with 28 projected for the final work.

Handsomely bound, the editions are printed by Edwards & Broughton, of Raleigh, with Bill's State Magazine the publisher. Bill labels his work the first detailed description of North Carolina by counties since "Wheeler's History." Actually, the texts have already appeared in "The State Magazine", written in ex-newsman Sharpe's easy-to-read style and containing much more than the sometimes dry facts of the customarily · known geography. The book is well-illustrated, contains maps of each county, with details on both general and specific history, the county economy, and with details on incorporated communities of

In the Cleveland County section is contained one of the best pictures of the late Governor-Senator Clyde Roark Hoey, I've ever seen.

m-m

In addition to the factual content on one-fourth of the state. was particularly charmed with Bill's dedication which reads, "For E. N. Pope. They don't hardly ever make this kind anymore.'

m-m

The then-projected geography of the state had the praise former - Governors Cherry, Umstead and Hodges, and its first volumes elicited the commendations of Hugh Lefler, one of the state's eminent prosional historians, of Inglis Fletcher, the specialist in historical novels, and major echelon's of the state's press. Of the several favorable comments. agree with all. At \$6 for volume III, the Salisbury Post cation.'

I, too, among many, look forward to Volume IV.

The other addition is a copy of Dr. James Carpenter's study on Charles Gore, the English theologian, what I would term a "deep" work from a partial perusal. This tale doesn't concern the work itself, but the circuitous means by which Clarence Carpenter, the author's father acquired a few co-

m-m

It was last June when Clarence cabled the publisher, Faith Press, London, for some copies, with instructions to ship to his postoffice box and bill him through First Union National. Instead of handling the order instructed, the publisher did a little questionable file-checking, meanwhile guessing that a purchaser of a book of this type would be a relative and sibly a former customer. Upshot was that Clarence's orer was shipped to a one-time Faith customer, a Rev. Mr. Carpenter, of Toronto, Canada. The Toronto minister had died, and the books went to his son, Horald Carpenter.

Mystified and curious, Toronto's Harold Carpenter did what Clarence terms an excellent "Royal Mountie" job in contacting him as the possible customer. A bit put-out, Clarence wrote the London publisher his displeasure. The reply: Clarence shouldn't expect him to know where Kings Mountain was, anymore than the publisher would expect Clarence to know whether Nether Wallow is in England, Scotland or Ireland. At last reports, Clarence, who finds Kings Mountain (but not Nether Wallow) listed in work on the Battle of Kings Mountain to air mail to Lon-

Meantime, Clarence finally got the publisher's bill, has had ficulty translating 18 pounds, 30 shillings sixpence, into American cash. From Englishman Albert Dunne: a shilling one-twentieth of a pound, a nice one-twelveth a shilking.

"Stop looking like you wanted that one, or the girl will think you are henpecked!"
