### A few quiet words

There is no need to shout. Winston speaks for itself. It is America's largest-selling filter cigarette, by far.

What does Winston have that makes it the leader? Quite simply, the facts are these:

*Winston has a pure white, modern filter.*

*Winston has exclusive Filter-Blend—fine tobaccos specially selected, then specially processed for filter smoking.*

*And, of course, Winston has flavor—the best there is.*

So if you are thinking of changing to a filter cigarette, consider this:

*People who know and enjoy filter smoking make Winston their overwhelming choice.*

We think you will, too. Because... Winston tastes good, like a cigarette should.
