Record Highs In Insurance Facts Reported

By the end of 1964, an estimated 149 million Americans were protected by some form of health insurance against the costs of ill health, the Health Institute reported today in a review of the past year.

This figure represents 78 per cent of the U.S. civilian population, the Institute said, and is an increase of 3.7 million persons over the number protected in 1963.

Benefits paid to insured persons last year were estimated at \$8.6 billion or some \$800 million more than in 1963. These benefits were paid by over 1,500 insurance organizations including 903 insurance companies, 77 Blue Cross and 72 Blue Shield plans, and nearly 800 other health care plans.

The Institute said that record highs were established in 1964 in both the number of persons protected and in the amount of benefits paid out.

Of the 149 million persons protected under hospital insurance in 1964, an estimated 139 million persons also had surgical expense insurance and in 1964, an estimated 139 million persons also had surgical expense insurance and 105 million also had regular medical coverage. The increases over the 1963 totals for surgical and regular medical insurance were 4.1 million and 3.3 million persons respectively.

Major medical expense insurance companies, continued to be the fastest growing of all health insurance programs, the Institute said. In 1964, an estimated 45.5 million persons had major medical insurance protecting them against the costs of serious illness or injury, either in or out of the hospital. That's an increase of 8.3 per cent or 3.5 million persons over the number protected under major medical in 1963.

Loss-of-income insurance which helps to replace lost wages of insured persons when they are disabled due to illness or injury, protected an estimated 48 million persons in 1964, the Institute said. This is an increase of one million persons over the number protected in 1963.

Low-Cost House Plan Is Available

A low-cost house plan has been drawn up by the architects and engineers of the U. S. Department of Agriculture's Cooperative Farm Building Plan Exchange and is being made available by the N. C. Agricultural Extension Service.

The design, Plan 7170, uses masonry units for the interior partitions as well as the exterior walls. The interior is unfinished except for the insulating tile ceiling and asphalt tile floor.

This plan fits three bedrooms, a living room, a kitchen-dining room, a work area, one complete bath and an additional toilet into 1,173 square feet of living area. This is well within the limits prescribed by the Farmers Home Administration for construction.

The centrally located heating unit may be of the space heating variety or may use insulated ducts in the attic. The rear entrance opens directly into the work area. A carport may be added behind the house if desired.
