A QUICK & EASY OUTLINE OF FURNITURE PERIODS

Surveys show that many people would like to know about the major furniture periods in history, but these surveys also show that

lot of people are embarrassed to ask questions about furniture periods. So, in our next two weekly columns we will present an outline for all of you. Here's Part I.

EGYPTIAN. This is history's first home furniture we know of. It was sturdy and straight. Animal legs and the claw-foot were widely used.

GREEK AND ROMAN. The little that remains of furniture of this period shows great strength, simplicity and beauty of design.

MEDIAEVAL. This period often called Gothic, was between 500 and 1450 A.D. and reflects the great influence of the church.

ITALIAN AND FRENCH RENAISSANCE. This was a 14th century declaration of freedom from authoritarianism of the Middle Ages and a return to the great classic traditions of ancient Greece.

LOUIS XIV. This period reflects the sumptuous extravagance of the king and court at that time. Nothing could be too elegant or too elaborate.

LOUIS XV. Chair legs are curved as compared with the straight legs of Louis XIV.

LOUIS XVI. This is the most beautiful and widely copied of the French periods. The tapered, fluted chair legs recall the Greek column. Next week we shall continue our history of furniture periods.
