

Memorial Day Traffic Toll May Escalate

An increased flow of vehicles heading toward the mountains and seashore over the long Memorial Day weekend will create additional traffic hazards that may claim the lives of at least 20 persons in accidents on North Carolina's streets and highways, the N. C. State Motor Club warns.

The official holiday highway fatality count will extend a period of 78 hours from 6 p.m. Friday, May 27, through midnight Monday, May 29. The 1965 traffic toll was 16 killed and 529 injured in 760 accidents during a

similar period. Leading driver violations reported were: speeding, 182; driving left of center, 129; failure to yield right of way, 105; reckless driving, 82; and following too closely, 69.

The motor club bases its estimate on past experience of motorists during holidays coupled with current driving and fatality patterns, said Thomas B. Watkins, president of the club and the National Automobile Association.

"Since Memorial Day traditionally marks the opening of the summer vacation season, increased congestion on the highways will greatly increase the danger of accidents and pose problems of safety, convenience and patience," Watkins said. "So heed the good driving rules. Be alert and considerate—and be safe."
