The Veterans Corner

Q—I am separated from my husband. However, he says he will continue me as the principal beneficiary on his National Service Life Insurance policy if I agree to pay the premiums. If I agree to this, is there any way I can be sure he won't change beneficiaries without my knowing it?

A—No. The insured may change the beneficiary on his policy at any time without the beneficiary's knowledge or consent. If you go along with your husband's suggestion, you'll have to gamble on his good intentions.

Q—I am a World War II veteran with a \$10,000 NSL insurance policy. My policy number is prefixed with the letter "H". All my friends have policies with a "V" prefix, and they get a dividend every year. I've never received a dividend and I'd like to know why.

A—Policies with "H" numbers are nonparticipating policies and no dividends are payable on such insurance. "H" insurance is a special type which was issued between August 1, 1946 and December 31, 1949. The requirement of good health was waived because of a service incurred disability; thus no dividend is accumulated or paid because of the higher insurance risk.

Q—I am a Viet-Nam serviceman hospitalized pending retirement. I have recently applied for Vocational Rehabilitation and understand I will be rated for service-connected disabilities by the Veterans Administration before I am discharged. What I want to know is, will this rating set the one year period I will have to apply for service disabled veteran's insurance?

A—No. The rating made by the Veterans Administration before you are discharged is an administrative rating made to determine your entitlement to Vocational Rehabilitation. Your one year period for applying for service disabled veterans' insurance will commence by the VA subsequent to your discharge.

GYNECOLOGY URGED FOR LITTLE GIRLS

New York (WMNS) — A little girl, even as a big one, may need a gynecologist's attention from time to time and there is no good reason for denying it to her. This observation was made at a recent meeting here by Dr. Vincent J. Capraro, assistant clinical professor of obstetrics and gynecology at the State University of New York at Buffalo. Noting that young children, too, can contract vaginal infections and can have any one of a number of gynecological problems, the physician urged prompt attention to these ills.

If a mother is reassured that her little girl will not be damaged in any way she, in turn, can be reassuring to her child who will then accept examination without any trauma resulting. Sometimes little girls, for reasons known only to themselves, will insert foreign bodies such as clips, crayons, small toys into their vaginas and these, of course, must be removed as promptly as possible by a doctor.

An adolescent girl may need gynecological help for reassurance concerning physical development, menstrual problems, and for a variety of other conditions she may be disturbed about.

MEDICINE CABINETS OVERFLOWING

New York (WMNS)—A study made recently by the Stanford Research Institute of 86 households in California showed the following:
● The 86 households had a total of 2,539 medications on hand.

● Only 445 of these were prescription drugs. The rest were purchased over-the-counter without a prescription.

● The largest number—725—were compounds for the skin for treating sunburn, athlete's foot, cuts, poison ivy, and so on.

● In second place were the 565 items used for coughs, colds, and earaches.

● Next came 341 items for gas-

trointestinal distress—indigestion, constipation.

● In fourth place were the 275 compounds which act upon the central nervous system, to relieve pain.

See how your medical stocks compare. And while you're at it, safeguard your family health: Discard old drugs or those without adequate labels.

Make sure that all drugs are out of reach of children.

NEW BOOK EXPLORES WOMAN'S WORLD

New York (WMNS) — To be born a woman is not necessarily to live easily and comfortably as a woman. Values become confused. The workings of the body are not clearly understood. Relations between the sexes become tangled. A just published book, *Private and Personal*, by Grace Naismith, is a helpful guide through the intricacies of womanhood. It explores directly and warmly the richness of womanhood in all its facets. It talks clearly about sex and sexuality, about contraceptive techniques as well as parenthood.

Health And Safety Tips

The home gardening season is in full sway across the nation again this month.

After long months of winter, followed by spring rains, millions of American householders are back at the annual battle with crab grass and insects in the perennial effort to add a touch of natural color and beauty to the American scene.

The American Medical Association recommends gardening as good therapy and good exercise for almost everyone. Gardening also entails some hazards of health and safety, most of which can be avoided.

*If you have done nothing more strenuous than sit by the fire most of the winter, by all means take it easy for the first few weekends of gardening. Give your muscles a chance to regain strength gradually, rather than trying to do too much on the first day out.

*Gardening often brings cuts and scratches from twigs, thorns, sharp tools. First aid usually consists of washing the scratch with soap and water and applying an adhesive bandage. Let it bleed a little to wash away impurities. Deeper cuts may require medical attention.

El Paso is the largest city on the U.S.-Mexico border.

MEMO TO ADVERTISERS

about NEWSPAPER ADVERTISING

- Q. What are the 3 most important rules for profitable newspaper advertising?**
- A. 1. Your advertising message should be new, friendly, informative, easy to read. Give facts and news about your merchandise and service.**
- 2. Advertise regularly. Make your advertising do what successful salesmen do—call on customers and prospects consistently.**
- 3. Insist on audited circulation reports that give you the FACTS about the audience that your sales messages will have when you buy newspaper advertising.**
- Q. Is there a measure for the value of newspaper circulation to an advertiser such as the standards a merchant uses in buying merchandise—for example, like STERLING on silver?**
- A. Yes—in the well known circulation standards of the AUDIT BUREAU OF CIRCULATIONS.**
- Q. What is the A.B.C.?**
- A. The A.B.C. is a cooperative, non-profit association of 3,450 advertisers, advertising agencies and publishers in the United States and Canada. Organized in 1914. Brought order out of advertising chaos by establishing a definition for paid circulation, rules and standards for measuring, auditing and reporting the circulations of newspapers and periodicals.**
- Q. What does A.B.C. do for me?**
- A. At regular intervals one of the Bureau's large staff of experienced circulation auditors makes a thorough audit of the circulation records of each publisher member. The results of each audit are published in an easy-to-read A.B.C. report for your use and protection when you buy newspaper advertising.**
- Q. What are the FACTS in A.B.C. reports?**
- A. A.B.C. reports tell you how much circulation, where it goes, how obtained and other FACTS that help you buy advertising as you would make any sound business investment—on the basis of known values and audited information.**
- Q. Are all publications eligible for A.B.C. membership?**
- A. No. Only those with paid circulation. This is important to advertisers because it is evidence that the paper is wanted and read.**
- Q. Is this newspaper a member of the Audit Bureau of Circulations?**
- A. Yes. We are proud of our circulation. We want you to know the FACTS about the audience your selling messages will have when they appear in these pages. Ask for a copy of our latest A.B.C. report.**
