

### Gardner Grant To Provide Home For Postons

BOILING SPRINGS—Trustees of Gardner-Webb College have unanimously accepted a \$75,000

grant from the O. Max Gardner Foundation, Inc. for the purchase of a new home for the president. The lovely new home is located on a wooded knoll in the River Bend Acres development and is adjacent to the country club building of that development. Dr. and Mrs. E. Eugene Poson are expected to occupy the home on or before August 5 of this year. Recently constructed by the Paul Porters, the home is on a three acre site. It is completely carpeted, air conditioned and has four bedrooms, three and one-half baths and is especially adapted for entertainment. The 5,000 square foot new home is expected to be a great asset to the college while the present president's home is expected to be used as a guest house. The college has long needed a guest house due to a lack of motel facilities in Boiling Springs.

More than 8,000 handicapped children will attend Easter Seal camps this year, and several thousand more will attend regular camps on Easter Seal camps.

### Young Voters For Roark Set Meeting

The Young Voters for Lester D. Roark in Cleveland County will hold an open meeting Thursday night at 7:30, according to the group's chairman, John Brock.

The meeting will be the first held in Roark campaign headquarters at 108 South Washington St. in Shelby—the old Spangler Realty Co. location next to the Masonic Building. Roark, who is running for Seat No. 2 in the three-county District 43, will be present at the meeting.

Brock extended an open invitation to all young voters in the county, through the mid-40's, to attend, and said, "We believe that all young voters ought to be involved in politics because they will be more directly affected than any other age group by the affairs of today."

"For this reason we are extending an opportunity to young voters to become involved, and to learn how the system works from the precinct level on, up through actual participation."

Brock particularly urged representatives from each precinct in the county to attend. He said the organization hopes to eventually reach as many as 2,000 young voters in Cleveland County, and said similar organizations may be formed by Roark supporters in Polk and Rutherford Counties.

Young Voters for Roark is made up entirely of volunteers, according to Brock. The group opened the South Washington Street Roark headquarters on a purely voluntary basis.

### Rescue Squad Is Inspected

Cleveland County Rescue Squad was inspected Friday by the State Board of Health. The building and ambulances were inspected by Ralph Dedmon, a state inspector. The Rescue Squad received an ambulance permit showing that they passed this inspection. The building and ambulances will be checked by the Health Department several times a year for cleanliness and equipment.

Several of the members are attending an ambulance attendants school in Shelby. This school started on Monday. The members will attend this school from 7 until 10 each night until they receive 22 hours credit.

Attending this class are: Jerry White, Job Wright, Mack Smith, Bud Ware, Crayton Dellinger and Thomas Hicks.

All remaining members will begin a class beginning April 22. Also attending these classes will be Bennett Masters, John White, and N. M. Farr from Harris Funeral Home.

Since 1956 more than \$2.5 million has been spent by the Easter Seal Research Foundation for projects to fight crippling.

The Easter Seal Society spends \$25 million each year to help handicapped children and adults live happy, full lives.

Weekly Health Tip

By WILSON GRIFFIN

In an emergency — for serious external bleeding, apply pressure directly over the wound, pressing the wound together. Use a first aid dressing, clean cloth, or even the bare hand if necessary. When bleeding has been controlled, do not remove the dressing. Use a tourniquet only as a last resort.

Health is precious . . . let us help protect yours . . .

INNOVATIONS THAT SQUEEZE THE WASTE OUT OF DISTRIBUTION SOUTHERN RAILWAY SYSTEM, WASHINGTON, D. C.

How fast can we locate a car on our 10,400-mile railroad?

Would you believe 2 seconds?

Let's say you're a Southern Railway customer who wants to know the whereabouts of your freight. So you can gear production schedules to rail delivery of raw materials, or reduce warehousing and handling costs through close coordination of en route shipments.

Through our Direct Inquiry Service—which employs the largest centralized computer complex in the railroad industry—you simply contact our computer and give it the iden-

tification number of the car carrying your freight. In less than two seconds, the computer will start printing your reply, giving you all the information needed to pinpoint the location of the car on our System.

This service is available 24 hours a day, 7 days a week and is answering customer queries on some 12,000 cars a day. It is one of a host of Southern Railway innovations benefiting shippers and consumers by squeezing the waste out of distribution.

Innovations and improvements that enable us to squeeze the waste out of distribution benefit all who live in the Southern-served South. By reducing the total cost of transportation they help combat today's trend of steadily rising consumer prices. They attract new industries into the South and help industries already located along our lines to grow and expand, providing more and better hometown job opportunities. All of us benefit!
