 high in available nitrogen. If the plants do not receive enough fertilizer, the leaves may turn a pale yellow, may drop, few flowers may form and the stems may be shortened. If a good potting mixture is used at planting time, most house
 sissolve one teasponrul in a quart (or this ratio if you need more than one quart) of warm water. Stir well and let stand overnight. The next morning, stir, vigorously, and apply. When applying plant nutri-ents in liquid form, or in suspend-ed solution, use enough of the so-lution to thoroughly wet the en-lution to th

28.90 the soil mass in the container. Acid-loving plants, such as aza-leas, will develop chlorosis if the 9.82 soil is too alkaline (sweet). This is expressed by a mottling of the 11.26 leaves, especially between the Chlorosis may be quickly cor-16.32 leaf veins and along the midrib. rected by spraying the foliage 4.00 with a chelated iron compound or Map 226 Blk E Lot 7 Vestula P. Wilson Map 214 Blk 3 Lot 12 Rockford Henry Wise adding this material to the soil.

26.52 However, to permanently correct chlorosis, it will be necessary to 13.69 make the soil more acid (pH 5.5) by adding iron sulfate to the soil.

Not everyone appreciates a relative who spreads rumors. But Dr. David Caldwell and his wife, Rachel, were eternally grateful for the rumor spread by Rachel's sister, Mary Dunlap. Dr. Caldwell was truly an all-around man. From 1768 to 1824, he served as minister to two congregations in the Greensboro area. He

was also a self-taught doctor of medicine, an educator and an outspoken critic of British tyranny

In fact, he was so influential, he was forced to spend almost the entire revolution in hiding.

One day he returned to his home and was seized by the enemy. It was a great moment for the British, but only a moment.

The next move was a mistake. They decided to ransack his home before taking him back to their camp.

Leaving him with a guard, they set about their destructive work. Mary, who happened to be with the Caldwells at the time, saw this as an opportunity and gambled. She approached Dr. Caldwell and whispered, just loud enough for the guard to hear, "Shouldn't Gillespie be coming?" Gillespie was the leader of a small but effective army of patriots. And he was nowhere in the area. But the guard didn't know that. So, fearing that he and his men were about to be attacked, he warned the officer-

in-charge. The officer rounded up his men and hurried away, leaving Dr. Caldwell and his wife in peace. It is difficult to measure fully Dr. Caldwell's influence on the people of his time. But we do know that five-state governors, fifty ministers and many physicians, lawyers and judges received their classical edu-

cations in his little school.

Had Dr. Caldwell been taken away that day, he might never have continued his work. But thanks to the imagination and in-

genuity of Mary Dunlap, he carried on. Mrs. Dunlap's rumor happened almost 200 years age. But the imagination and ingenuity it demonstrates continues today

At Duke Power, imagination and ingenuity have always been a part of our philosophy. When Duke Power was founded in 1904, the company's concept of turning the entire Catawba River Valley into a hydroelectric system was an innovation.

For the 1970's we're putting imagination to work in building one of the world's largest nuclear generating stations at Oconee, South Carolina.

And our philosophy will continue to work for the people of the Piedmont as long as we serve this area.

Duke Power Working for the Piedmont in the spirit that made it great

Free reprints of this series are available through your local Duke Power office.
