GOVERNMENT IS BIG BUSINESS:

Why then should we not run government with the same progressive, efficient, cost conscious, way any successful business is run? Why shouldn't we strive at all times to give better service at a lesser cost to our public? Why shouldn't we try to eliminate waste in government whereby these savings could be returned to our taxpayers, like dividends to stockholders. The operation of any government regardless how large or small must be run by competent individuals who know the principals of good business. Our investment is too great and our future too bright in Kings Mountain, to fail to see the need for qualified people in government. For Honest, Efficient, Progressive representation
