Letter To Editor

Dear Mr. Harmon:

We are deeply grateful for your valuable contribution to the 1969 March of Dimes campaign. Your generous cooperation helps to make it possible for thousands of birth defects children to get a second chance at life.

Important breakthroughs have recently been made to prevent birth defects caused by German measles and Rh blood disease. We feel that these are just the beginning and look with hope toward a day when most birth defects will be preventable.

We appreciate your public service efforts in helping to meet this challenge and invite your continuing interest and support of our program.

Sincerely,
Clarence W. Walker, Chmn.

Congressman James T. Broyhill's Washington Report

COMMUNICATIONS SATELLITES

A telephone call from a foreign country—a fast-breaking news story in Europe seen as it happens by television viewers in America—these are everyday occurrences which were impossible a few years ago. They are possible today because of the development of communications satellites.

All types of modern communications, voice, telegrams, data, and television span the oceans and continents with ease because of the existence of satellites stationed in orbit far above the earth's surface. In fact, communications satellites offer the only existing means for live inter-continental television. Already, many historic events have been viewed on live television via satellite by hundreds of millions of persons on several continents at the same time. As dramatic as television is, it accounts for only a small portion of the use of the satellite system which is presently developing. Most of the traffic carried by the satellites are telephone and teletype communications.

The final passage last week of the funds to operate the National Aeronautics and Space Administration for another year has stimulated my thinking about the practical applications of the space program. The space program is not oriented just to put a man on the moon. There are practical applications, as well, and world communications is one of the more important and dramatic examples of great benefits that we of America can derive from the space program.

Seven years ago, the Congress, in order to facilitate the development of satellite communications, created the Communications Satellite Corporation. The Corporation is operated by a board of directors, including three members appointed by the President and twelve members elected by the various stockholders of the Corporation.

Comsat, as the Corporation has come to be called, is now entering a period of development during which the facilities and services that it offers in the field of international communications will take on new dimensions. The simple fact is that the communication satellite system has proven to be a success and has the capability

of serving the growing international communications requirements. Just a few short years after the launching of the pioneer Early Bird satellite, a new series of communication satellites have been put into orbit and even more complex and sophisticated satellites are in the planning stage.

The total communications capacity of all of the cables thus far laid across the ocean floor. In the future, satellites will be increasingly used to meet the growing communications needs, particularly the need to transmit information such as data exchanged between computers. This will enable tremendous volumes of business and financial data to be exchanged at high speed across great distances.

International communication traffic is now increasing by approximately 20% a year. Rapid exchange of information and data through the satellite system will encourage international commerce. We can easily see that the technological improvements in the communications field can create not only new markets for American business but also give stimulus to the creation of entirely new fields of employment.

The Communications and Power Subcommittee in the House of Representatives, on which I serve as senior minority member, has the continuing statutory duty of reviewing the operations, activities, and accomplishments of the corporation which was set up under the Communication Satellite Act of 1962. In the months ahead, my committee will be exploring on a general basis the idea of a system of satellite communications serving the domestic U. S. requirements. In addition, there will be a need to examine a number of other major questions. Studies must be made to determine if we are now making the best use of the radio frequency spectrum. A timetable for the economic feasibility of a domestic communications satellite must be established and we must decide whether this system should be created for specialized or general purposes. Perhaps we will need more than one system. These are just some of the problems with which the Committee will be dealing in the future so that mankind can derive maximum benefit from this new and vitally important means of communication.

Bethware News

Mr. and Mrs. Earnest Frye, Jerry and Everette of Newton, N. C. were recent visitors of Mr. and Mrs. Gaston Grigg.

Mr. and Mrs. John Senter and daughter Betsy of Gastonia were Friday supper guests of Mr. and Mrs. Horace Bell.

Mr. and Mrs. Clyde Ross of Fort Mill, S. C. and Mrs. Ila Grigg of Gastonia were weekend visitors of Mr. and Mrs. J. L. Ross.

Mr. and Mrs. Garvis Ross and family, Miss Debbie Ross and Mr. and Mrs. Hugh Sperling of Shelby arrived home Sunday after spending last week at Windy Hill, S. C.

Mr. and Mrs. Maynard Ross and Miss Lori Ann Ross spent the weekend at Windy Hill, S. C.

Mr. and Mrs. M. M. Thornburg and family of Tampa, Fla. arrived last Friday to visit Mr. and Mrs. Wary Thornburg and

relatives.

Mr. and Mrs. Horace Bell, Mr. and Mrs. Jay Patterson and daughter Gina left Saturday morning to spend several days at Holden Beach.

Mr. and Mrs. Grady Dixon and family spent Saturday with Mary Wright.

Mrs. D. M. Teague, Mrs. Estelle Barber and Mrs. J. M. Wright visited their brother Paul Barber of Highland Hall Rest Home in Boone last Tuesday. Mrs. Lloyd Turner, Mrs. J. M. Wright and Marguerite spent Monday visiting Mrs. D. M. Teague and Miss Estelle Barber of Charlotte.

Mr. and Mrs. Sam Lovelace and son Jerry went on a mountain trip to Blowing Rock Saturday. The David Baptist church Brotherhood will have breakfast next Sunday morning at 7 o'clock.

Sunday visitors of Mrs. J. W.

Bell were Mrs. Paul Bell, Mrs. Jonas Bell and sons Chris and Randy, Mr. Henry Bell of Charlotte.

Mr. and Mrs. W. A. McSwain and family spent the weekend at Cherokee, N. C.

Rev. Alfred Hastings, pastor of David Baptist church moved into the parsonage Wednesday. He will begin his duties next Sunday.

Mr. and Mrs. Giles Bell and family left last Saturday morning for Crescent Beach, S. C. They will visit Mr. and Mrs. Bobby Porter.

Mr. and Mrs. Sam Withrow of Lawndale and Mrs. Ross Reid of Thomasville, N. C. were Sunday afternoon visitors of Mr. and Mrs. Franklin Davis.

Mr. and Mrs. Sam Withrow of Lawndale were supper guests of Mrs. Lela Page Sunday night.

Sgt. William L. Stone of Fort Bragg spent the weekend with his parents, Mr. and Mrs. W. F. Stone, Jr. and family.

THE RUSHINGS ARE COMING ... THE RUSHINGS ARE COMING ...

The James Rushings are gone on vacation that is and that's where all the Craftsman families are this week. July 4 means fun and sun for everyone at Craftsman and you'll find them everywhere from the beaches to the mountains. Some of them are even going to both. Such is the case of the James Rushing family. As you might guess by the picture, they love outdoor life and they enjoy it by camping. The Rushings have been camping for several years now and know all the tricks of the trade. James says the modern day camper has all the conveniences of home, power and water at your camp site, clean showers and restrooms certainly add to the comforts of camping. He has also accumulated about every piece of

equipment needed for a successful camping trip. Their camping trips have taken them as far north as Pennsylvania and as far south as Miami, Florida. James states that you meet some of the finest people in the world on camping trips. Everyone is always eager to be friendly and helpful. Another enjoyable thing about camping is meal time. There's something about the great outdoors that makes anything you eat taste just great.

This week the Rushings are enjoying their vacation. Next week James will return to his job at Craftsman Yarns Company as foreman of the cotton warehouse. He has been employed at Craftsman only a year now and just recently graduated from Belmont Textile School completing a course in Yarn Manufacturing. We congratulate him on this fine achievement and take this opportunity to wish him, along with all his fellow Craftsman employees, an enjoyable and safe vacation.
