Plant Vacations Are Observed

Burlington Industries observed the holiday season with plant and office vacations and its traditional Christmas parties for employees and their families.

According to Warren Stockton, plant superintendent, the Phenix Plant closed for the Christmas holidays from December 20th until Dec. 28th. Children of the employees were treated to a Christmas Party on Sunday, December 14th.

More than \$4 1/2 million in bonuses were paid to wage employees at Burlington during the holiday season. The December payments, plus vacation pay Burlington employees received last summer, total approximately \$9 million during this calendar year.

Burlington employees received bonuses to coincide with scheduled manufacturing plant closings for the holidays. Individual amounts were based on length of service.

1040 Form Is Consolidated

Greensboro, N. C. — Each of the 18 million taxpayers in the United States who filed the now discontinued card 1040A form last year, has received a postcard explaining the change to the new consolidated 1040 form, the Internal Revenue Service announced today.

This year all taxpayers will receive a larger, complete tax package that includes the one-page basic 1040 and additional pages or schedules, which may or may not be used according to the taxpayer's needs.

Past 1040A-users will find that except for a few lines, the new 1040 asks for the same information as the old card form and that they will probably not need to file out more than one sheet of paper to make out their returns, the card says.

In the past, taxpayers who used the 1040A could not take advantage of certain tax credits or exclusions and could not itemize their deductions. A principal reason for making the change to the new form is to enable taxpayers to take full advantage of the tax benefits the law provides, the postcard says.

Most taxpayers should receive their individual tax forms and instructions by mail the first week of January.

SOCIAL SECURITY

Q. The bank asked me to get a social security number for my two-months old son. Why does he need a social security number?

A. Social security numbers are needed by the bank to report interest income to Internal Revenue Service. In other words, a social security number is also used for tax purposes.

Q. My name is "Smith" so my social security card shows this name. There must be two million other "Smiths." How does social security keep my earnings under social security separate?

A. You're right! There are over two million "Smiths." However, you're the only Smith with your social security number. Your number keeps your record separate from all others.

Q. My father died last year and my mother, age 51, received the LSPD. Since his death she has become disabled with a severe heart condition. Can she receive disability benefits as his widow?

A. Disabled widows between age 50 and 60 may be eligible for disability payments on their deceased husband's earnings. You should have your mother contact her local social security office as soon as possible.
