Olan Horn and Clyde Bright, who are working in Atlanta, Ga. spent the weekend with their families here.

U. S. commercial fishing is a \$6-billion business.

Sulphur is used in many fungicides.

Garden Time

"What is meant by chlorosis and how can this condition be treated when occurring on azalea plants?"

When azalea leaves lose their normal green color and become yellowish they are spoken of as being chlorotic. Sometimes the yellowing follows a rather definite pattern with the midrib and veins remaining green and other parts of the surface turning yellow.

This lack of normal leaf color develops as a result of a trace element deficiency and is not associated with a disease organism. These trace element deficiencies are becoming rather wide spread in many crops and bring into focus the importance of proper nutrition.

The most common form of chlorosis on azaleas is caused by the lack of available iron brought about by a soil reaction, pH, which is too high or sweet. The iron deficiency symptom is further aggravated in soils which are wet and poorly aerated.

For correction, the first and most obvious step is to adjust the soil reaction, or pH, by using either aluminum sulphate or sulfur, to a pH of about 5.0. A soil test will be necessary in order to make this adjustment intelligently.

Another method of correcting the chlorotic condition is the use of iron chelate (Key-late). Chelates are made from organic compounds and are considered to be stable and water soluble. They are effective sources of trace element correction in plant nutrition.

While iron chlorosis is the most common deficiency symptom on azaleas in most soils, chlorosis may also appear on plants grown in clay soils due to a deficiency of magnesium. This condition can be corrected by spraying, or sprinkling with one ounce of magnesium sulphate (Epsom salts) in 2 gallons of water.

In answering this question I do not wish to cause confusion because nematodes attacking the root system may also cause a condition resembling iron deficiency chlorosis. In one case the nematode interferes with the absorption of all nutrients while in the other case the soil reaction makes the iron unavailable to the plant.

Snuff production consumes about 32-million pounds of tobacco a year.

Mix the iron chelate with water according to instructions on the container. The solution can be sprayed on the plant or sprinkled over the plants with a watering can.

Cpl. Toney R. King Wins Promotion

(BS2205) CHERRY POINT, N. C. (FHTNC) April 22 — Marine Corporal Toney R. King, son of Mr. and Mrs. Samuel R. King of 201 E. Maryland Ave., Bessemer City, N. C., was promoted to his present rank in ceremonies at Marine Corps Air Station, Cherry Point, N. C.

School For Bank Robbers

Paris police have uncovered a training camp for bank robbers. It was found on a remote farm near the village of Niozelles in Southeast France. Authorities said the schooling routine was broken into classes. Mornings were devoted to shooting practice with revolvers and tommy guns and afternoons were devoted to classroom topics such as walkie-talkie techniques, use of gas masks and etc.

FIRST EDITION

A BARGAIN AT ANY PRICE.

This is the little book that shows a lot of interest in your money. We call it The First Edition. It's First Union National's new Passbook Savings Account. With a minimum deposit of \$500 you earn 5 3/4% interest. Then you can make additional deposits of \$50 or more at any time up to two years before the maturity date. You pick your own maturity from two to ten years but no withdrawals may be made before maturity except under emergency provisions.

The 5 3/4% true daily interest is compounded quarterly and paid on a calendar quarter basis. Each quarter we'll pay you the interest in person. Mail you a check. Or we'll credit it to another account at First Union National. Or you can simply leave the interest in your 5 3/4% Passbook Account to grow and grow. It's your choice.

If you plan to make additional deposits, ask about Automatic Transfers. This is a simple procedure of having a set amount of money transferred automatically from your First Union National checking account to your savings account on a predetermined day of the month. At no extra charge. Get your own personalized copy of The First Edition from First Union National. And watch your interest mount with every page.
