Weekly Health Tip

By WILSON GRIFFIN

Body fat is linked to infer tility, reports M chigan State Univ. nutr tionists. In 90% of rodents allowed to eat as much high-fat food as they wanted, became infertile. So did 80% of rodents consuming a limited amount of high-fut focd. The latter group weighed the same as rodents eating grain, but had more fat in their bodies. Whether the same results (infertility) would occur in humans can only be conjectured.
