KMers are wondering why city crews are now painting manhole covers white.

The answer is white will show up better in photos.

The city has contracted for planimetric and topographical mapping, which involves aerial photography. The job is being done now before trees and flowers bloom so the landscape will not be indefinable from the air.

The white manhole covers will give the aerial photos clear reference points for future planning around existing streets and developments.

Rising Costs Reduces Your Insurance Coverage

Everyone knows the effect inflation has had on the goods we want or must buy, but few stop to realize that inflation has also increased the value of goods we have already purchased and are using.

For example, according to the consumer price index, the cost of buying a home increased 94.8 percent between 1967 and October of 1976. During that same time period, the cost of our clothing increased more than 50 percent, the cost of household furnishings increased better than 55 percent and the cost of appliances, such as stoves, refrigerators and dryers has increased from 36 to 51 per cent.

"These are just numbers," Larry Hamrick of the Warlick Insurance Agency said. "The impact of those numbers comes home to an individual whose home and other possessions are damaged or destroyed by fire, or who has been

burglarized."

All policies have limits of coverage for both home and contents. "If these limits are not periodically reviewed and updated," Hamrick said, "the shock of a fire or theft would be followed by a second shock when the customer discovered his policy limits were not high enough to cover rebuilding the home, or buying new contents to put in it."

Most companies and agents suggest a periodic look at coverages to be sure they are adequate to cover a loss and some policies have inflation clauses to protect a homeowner from falling too far behind inflation.

"We have found many people who are grossly underinsured due to the heavy inflation of recent years and we strongly urge regular reviews and the updating of policies to properly protect our insureds," Hamrick said.
