

HONORED FOR SERVICE — Mrs. Martha Mullinax receives a watch from W. K. Mauney, Jr., recognizing her 30 years of service to Mauney Hosiery Mills.

Plant Honors Long Term Employee Here

Martha (Mrs. J. C.) Mullinax has been honored for 30 years service to Mauney Hosiery Mills. Mrs. Mullinax received a Bulova Accutron watch and a 30-year pin.

A native of Kings Mountain, Mrs. Mullinax said the biggest change at the plant during the past 30 years has been its expansion in both business and plant facilities. The years and progress have

not changed what she considers the most important element there, however, "its people." Said Mrs. Mullinax, "The people at Mauney are still wonderful people to work for." "I have enjoyed working here, the benefits are good and the people have been good to me. I've never wanted to go anywhere else."

When Mrs. Mullinax first came to Mauney Hosiery, she worked as an inspector for six months, then started work as a knitter. In her leisure time, Martha enjoys working in the garden with her husband and doing "work search puzzles."

She and her husband have been married 28 years.

Mauney Hosiery Honors Employees

Five Mauney Hosiery Company employees have been honored for service to the company.

Bill Fender, long-term employee of the Dye House and Assistant Dyer, Lillian Smith, of the Pairing Department, Andrew Brown, Maintenance employe, and R. G. Franklin, Purchasing Agent, have all received 10 year service pins and Dorothy Moore, employe

of the Greige Goods Department, has received her five-year pin.

President W. K. Mauney, Jr. presented the pins in recent ceremonies at the plant, commending the employes for their "good work and faithfulness to the firm."

A native of Marshall, N. C., Mr. Franklin and his wife, Sylvia, who supervises the Billing Department at Mauney Hosiery, celebrated on Feb. 14th their 25th wedding anniversary. They have two sons.

Mrs. Fender, native of Asheville, makes his home in Shelby with his wife, Rebecca, and their daughter, Melissa.

Mr. Brown and his wife, Geneva, have celebrated their 40th wedding anniversary and are parents of five children. Born in York, S. C., he has lived most of his life in Kings Mountain.

Mrs. Smith and her husband, Charlie, and their son, Ronnie, live on Route 3, Shelby.

Mrs. Moore and her husband, Robert, and their

ANDREW BROWN

three daughters live in Kings Mountain. Mrs. Moore is a Kings Mountain native.

PPG Announces Shelby Expansion

PPG Industries today announced a \$25-million-plus expansion of its Shelby fiber glass plant. When completed in mid-1979, the expansion will increase the plant's production capacity by 40 percent and create about 225 additional jobs.

Completion of the expansion in mid-1979 will boost capacity at the Shelby plant to about 240 million pounds of continuous filament fiber glass annually, according to Robert A. McLaughlin, vice president and general manager of PPG's Fiber Glass Division. Continuous filament fiber glass, which excludes insulation products, is used in plastics and rubber reinforcements and for textile yarn.

The expansion project includes the addition of new glass melting furnaces, complete with forming and fabrication equipment, and the rebuilding and enlarging of an existing furnace.

"The expansion was dictated by two rapidly growing markets for fiber glass — reinforced plastics and fiber glass paper for building products," McLaughlin said. He added that industry shipments to the plastics reinforcements markets are expected to show a compound growth rate of more than 14 percent annually over the next five years.

"The use of fiber glass paper to reinforce roof shingles has greatly expanded this past year," according to McLaughlin. "Projections show that by 1982 more than 40 percent

of all shingles will use fiber glass paper instead of the conventional felt material because of its improved fire resistance and other qualities."

McLaughlin noted that the expansion also will contribute to easing the tight supply situation that currently exists for PPG's continuous filament fiber glass products.

The expanded production capacity will be the seventh major expansion at Shelby since the plant began production in 1959. The facility produces continuous strand fiber glass for roving, chopped strand, chopped strand mat, yarn and tire cord.

Astrology

Course Is

Scheduled

Mrs. Judy Hendrixon will instruct a course in "Beginning Astrology" under the sponsorship of Cleveland Technical Institute.

The classes will begin March 16 and will be held each Thursday evening from 7 until 9 p. m.

Call Mrs. Hendrixon at 720-3106 for registration.

RECOGNITION — Zeb Waters, supervisor of preventative maintenance department at Kings Mountain's Burlington Industries Phenix Plant, presents a certificate of appreciation to Bob Moore, overhauler, for completing 10 years of employment with the local plant.

Gastonia Rec Dept. Classes

The Gastonia Recreation Department has had requests for classes in bridge, wood refinishing, tile painting, acrylic painting and children's art, but has been unable to locate instructors.

Persons capable of instructing these classes are asked to call Cynthia Byars at 864-3211, Ext. 207 if they are interested in part-time work. Classes generally involve 1-2 hours per week for 4-6 weeks.

All instructors are compensated for their time. Classes will meet on Tuesday or Thursday nights at Ashley or Highland Jr. High Schools beginning in March.

Classes will be offered as a part of the Community Education Program.
