HEADACHES

Also called sick headaches, a typical migraine attack begins with a dull throbbing ache in one area of the head and progresses to a piercing pain. These torturous attacks may be preceded by a change in the field of vision — a flickering before the eyes, flashes of light or a partial blocking of the vision. They are sometimes accompanied by nausea or vomiting. They are seldom relieved by aspirin. Their duration is from 2 to 48 hours.

Foot Report

Exton, Pa.—Foot Mineral Company reported a net loss of \$895,000 for the second quarter of 1983, compared with a net loss of \$1,054,000 for the same period in 1982. Sales were \$35.6 million, compared with \$34.1 million in the 1982 quarter.

Six months' net loss in 1983 was \$3,302,000, compared with a net loss of \$1,541,000 in the same period of 1982. Sales were \$65.4 million, compared with \$72.0 million in the 1982 period.

E. P. Comer, President and Chief Executive Officer, said the smaller loss in the 1983 second quarter was primarily due to increased profitability of Foote's lithium operations. Ferroalloy operations were unprofitable in the second quarter of 1983 as depressed selling prices, severe competition from foreign imports, and low levels of demand from customer industries continued.
