G-W Awarded Grant

BOILING SPRINGS, N.C.—As students arrive on campus for the first day of classes Tuesday, Gardner-Webb College announced today the award of a \$3000 grant to the college to aid in tutoring minority and handicapped students.

The grant was awarded to Gardner-Webb by the Southern Education Foundation headquartered at Atlanta.

"This grant will further advance our efforts to enhance the educational opportunities we can offer to our students. We are pleased the Foundation has expressed such confidence in our past success," said Gardner-Webb president Craven Williams.

The grant will be used to provide tutors to students whose testing scores or class grades indicate a need for further individual instruction in any college coursework. The college also offers a developmental studies program, established in 1977, to work with marginal students exclusively in writing, reading, and mathematics.

According to Williams the tutorial program is part of a broader effort at the college to aid such students. "Gardner-Webb believes that one of its special missions is to assist those who have not had the advantages of others in society," he said.

Williams said that special workshops and seminars are planned for minority students to develop self-confidence and personal esteem. In addition the col-

lege hopes to establish summer interships for minority students. "It is believed by most observers that working closely with minority professionals will provide important motivation," he stated.
