If Old Looms Talked, They'd Tell Some Tales

By **ROSALIND REID**
Special To The Herald
If old looms and spinning machines could talk, we might hear some surprising tales about the development of America's textile industry.

They would be stories of successes and failures, piecemeal progress and complex relationships among the makers and users of machinery and the government, says a historian of technology at North Carolina State University.

Dr. Julia C. Bonham, an assistant professor in NCSU's Division of University Studies, has studied and worked with those old machines to learn lessons that might be helpful to today's changing textile industry.

She has scanned census material, business records, old newspapers and trade catalogs to compile a broad picture of technological change in the industry.

The history, which she will begin writing next year with grant support from the Merrimack Valley Textile Museum in North Andover, Mass., will be a complex tale, she said.

"You find negotiations, crazy reasons—personality reasons—why an innovation works its way into a factory," she said. "It's gradual, piecemeal progress, a social process."

Old technologies are sometimes revived, she said, and innovations can be delayed. Personalities and relationships between machine makers and users may determine whether a new machine is tried out.

"Change is the result of relationships between people, not the machines' doing," she said.

Bonham launched her study of the textile industry as a doctoral project six years ago, hoping to develop the first history of textile technology that would go beyond the limits of traditional histories.

Those histories have equated technology with progress and touched only the high points of industrial history, she said. They are called Whig histories after a tradition rooted in the business-oriented Whig political party of the early 19th century.

"The Whig interpretations were very limited," Bonham said. "The notion that new technology is automatically good is a justification for not looking into both positive and negative effects."

The Whig approach promotes the simplistic notion that there is a technological "fix" for every social and economic problem, she said. Those histories did not explore the broad social context of change or discuss issues such as worker safety.

And historians have focused on big developments such as the power loom. Bonham has found that just as important are incremental changes improving the operation or safety of existing technology. "Little technological changes often have great economic and sometimes social impact," she said.

Bonham thinks industry leaders of today, looking toward major changes such as robotic technology, would do well to study the lessons of the past.

ADVERTISEMENT

The City of Kings Mountain will receive sealed bids at the Office of the City Clerk until 2:00 P.M., July 11, 1985, for construction of approximately 27,000 lineal feet of curb and gutter.

Details and specifications may be obtained from the Public Works Department, 1013 North Piedmont Avenue, Kings Mountain, North Carolina 28086.

The City reserves the right to accept or reject any or all bids as deemed in the best interest of the City.

PUBLIC HEARING

A Public Hearing will be held on the following re-zoning petition with the Board of Commissioners of the City of Kings Mountain on July 22 at 7:30 p.m. in the Council Chambers of the Governmental Services Facilities Center (New City Hall).

Petitioner: Kelly Bunch, 3000 Margrace Avenue, Kings Mountain, N.C., requests the re-zoning of the property known as the "Pauline Mill Property" located between City, Walker Streets, and Waco Road, Kings Mountain, N.C. From (L1) Light Industrial to (R-6) Residential Multi-Family for the purpose of constructing condominium or apartment dwellings.
