TO WHOM IT MAY CONCERN:

If you are the person that put a little golden female puppy out on Dixon School Road, November 16, 1986, please call and tell me what kind of dog the mother and father are, and when she was born.
She has a good home now, has had all of her shots, lots of love and is a very happy "Little Bandy" now.
You don't have to give me your name, but I would really appreciate it if you would call me at 739-3824 and give me the information.
Thanks
P.S. There is NO way you could have her back.

SCALDING
Nearly all scalds in children occur in bathtubs or showers. With water temp. at 150°F. (66°C) only two seconds immersion will produce a full-thickness burn, completely destroying the skin and requiring skin grafting. Water heater thermostats should be reset between 120°-125° F. (49°-52°C). At this safer temperature it takes about 2 minutes to produce a full-thickness burn - time enough to rescue a screaming infant or elderly bather.
