Q. I have had to have the Fuel Injectors cleaned in my car 3 times. What causes this?
A. Because of the location of the injectors in Multiport Injection System the fuel has to be clean and clean burning.
Octane is very important. There are several good additive type chemical cleaners you add to gasoline. These help. Also try a tank of Hi Test unleaded gas every now and then. Sometimes when you look at the total cost and difference in how your car runs, Hi Test gas is cheaper.

Headache? Try smiling!

If you often get tension headaches after reading or concentrating, looking in a mirror may show you the reason why. Many people have a habit of frowning or scowling while they concentrate on work, which causes tension in the facial muscles.

Any of the three common over-the-counter pain relievers- aspirin, acetaminophen, and ibuprofen- should help to quell a tension headache, but awareness may help avoid them.

Pay attention to what your face is doing while you concentrate. And try smiling!
