We've put emergency cardiac care on the map.

We're proud to announce a breakthrough in preventing death by heart attack—the Carolinas Heart Emergency Network. Now residents throughout the region can receive state-of-the-art cardiac care at their nearby community hospitals.

The network was formed to dramatically reduce the time between the onset of heart attack symptoms and the initiation of the most advanced treatment available today.

Community physicians and hospitals, cardiologists, surgeons and emergency transport professionals all work together to provide life-saving care during this critical time.

Immediate, sophisticated medical help for heart attack victims means a much greater chance for their complete recovery.

The Carolinas Heart Emergency Network. Putting the best cardiac care within everyone's reach.
