KMHS Honor Rolls

Kings Mountain High School honor rolls for the second nine weeks and first semester.

> (Second Nine Weeks) A HONOR ROLL

9TH GRADE - Jayda Biddix, Siamphone Phanthalack, Gary "Dee" Stewart, Anita Whitaker.

10TH GRADE - Ginger Baity, Shelia Bryson, Binh Davis, Melanie Dixon, Melissa Griffin, Jill Jimison, Tosheen Peters, Rebecca Senter.

11TH GRADE - Susan Eubanks, Angela Hawkins, Aimee Powell, Jason Rayfield.

12TH GRADE - Theresa Anderson, Tasha Barnett, Lena Brown, Carol Gilliam, Adella Robertson, Nicole Wall, Pamela White, Robbie Wilson.

A AVERAGE

9TH GRADE - Michael Bell, Micki Black, Ginger Blalock, Amanda Blanton, Melissa Carpenter, Shannon Caveny, Carlee Chambliss, Rebecca Champion, Courtney Goforth, Robert Heath, Tiffany Houze, Allison Kiser, Michelle Martin, Melissa McAbee, Emily Melvin, Janey Ollis, Chan Phanthalack, Stacey Reynolds, Denise Small, Molly Subler, Charlie Hope.

10TH GRADE - Chris Blanton, Doug Bridges, Stephen Fisher, Kathryn Goforth, Angela Hardin, William Harrison, Edie Hicks, Chad Huntsinger, Stephanie Jones, Jenny Krogulski, SaherSaba Peters, Lindsay Suber, Karen Wade, Todd

11TH GRADE - Aaron Allen, Dawn Hardin, Kimberly Hoyle, Leigh Kendrick, Maranda Ledbetter, Douangchit Mounghane, Danielle Nolen, Jennifer Payne, Derand Petters, Sengdevane Silapheth, Nicolas Werner.

12TH GRADE - Amelia Bell, Colisa Bess, Roxanne Bess, Sabrina Bess, Ami Butler, Elizabeth Cromer, Julie Denlinger, Christina Dixon, Amy Ford, Robin Garner, Susan Grant, Phillip Heavner, Michael Hollifield,

Sharon Horton, Michael Jordon, Katina Lewis, Jennifer Perkins, Richard Stout, Karen Thompson, Angela Whitaker, Derick Williams.

This Is Vocational Education Week

By CINDY HOVIS **KMHS** Teacher

Today's workplace is a fastpaced arena of constant technological change. To compete successfully, workers must enter the job market with up-to-date skills. During February 10-15, KMHS will celebrate Vocational Week. This year's theme is "Vocational Education: Classrooms of the Future." A look into these vocation classrooms provide examples of this theme.

Drafting students at KMHS are capable of entering their chosen field armed with more than a mechanical pen and ruler. These students, under the direction of Bill Wellburn, are developing skills in the art of computerized drafting through the use of a Versacad system. This system is a powerful computer tool for creating, drafting, storing and revising drawing of all types. Students are able to make drawing choices on a computer screen, then through the use of a "mouse" or input device, they are able to place their choices onto the screen to produce a drawing. The Versacad system enables students to produce professional-quality drawings in minutes compared to the tedious manual techniques which would take hours or even

days. One of Versacad's most enthusiastic supporters is Robb Cansler, who reports, "This year since I've learned a lot more about using Versacad, I feel as though I've fallen in love with it." Robb feels he is more likely to be be creative and experiment with more complicated designs because of the Versacad's technology.

Students in welding classes, guided by instructor Tim Heavner, are also training for the future with skills developed using Thermal Arc Pak 5XR, a plasma arc cutting system. Old-fashioned oxygen acetylene cutting devices are slow and are unable to cut aluminum, magnesium, or stainless steel. With the use of this plasma cutter, KMHS students are able to make clean cuts on most metal up to five inches thick, able to make cuts up

to five times faster than oxyacetylene cutting, and are able to do this with very little distortion of the cut surfaces due to the lower operating temperatures. In the future, plasma arc cutting is predicted to be widely used in the transportation, nuclear power and chemical industries. Even more exciting, plasma arc cutting is being implemented in automated or robotic fabrication operations, manufacturing techniques of the future.

Computer technology skill is be-

coming synonymous with successful entry into the business career areas. At KMHS, first year keyboard students learn to prepare letters and reports on computers. Computer Application classes, taught by Kathy Goforth, expand

CLASSROOM OF THE FUTURE-Reese Cochran, left, Travis Withers and Mark Stacey demonstrate the new Plasma cutting system in Welding III at Kings Mountain High School. Welding instructor Tim Heavner, not pictured, says the new equipment cuts metal up to five inches thick and five times faster than oxyacetylene cutting and in the future will be used in transportation, nuclear power and chemical industries.

KINGSMOUNTAIN W DANNIDIR DIN D 739-2300 24 Hours Per Day

Stephen Pat's Outlet strated in "Classrooms of the Elijah's Formal Wear Future" will enable the young men and women of Kings Mountain to begin their working careers with enthusiasm and confidence. LOVE IS BLIND. Maybe it's just near sighted.
