While there, Jill was involved in two courses entitled "Quality of Natural Waters" and "Morphology, Sedimentology - Wrightsville Beach."

Care grants available

Three or four child care scholarships will be made available to Kings Mountain High girls who plan to be members of the Teen Support Group at the high school next year. Each scholarship will pay for day care for one child for the 1991-92 school year at a quality Day Care in Kings Mountain. These scholarships are made possible

through a Single Parents, Displaced Homemakers and Single Pregnant Women Grant from the U.S. Department of Education.

Interested girls may pick up applications from Betty Gamble, Vocational Director for Kings Mountain District Schools. Her office is located at 500 West Parker

Street. Applications may be obtained from Dianne Hollifield at the high school after August 12. All applications must be returned to Dianne Hollifield or Betty Gamble by August 15.

More information may be obtained by calling the Vocational office or Betty Gamble at 734-5637.

School breakfast program adds sites

Kings Mountain District Schools Child Nutrition Program is adding two more schools to its breakfast program. Now students in all five elementary schools can enjoy breakfast at school.

The school breakfast program is designed to provide a good start toward meeting a child's nutritional needs of food energy, protein, vitamins and minerals. The breakfast

pattern of requirements consists of a serving of milk, a serving of fruit or vegetable or full strength fruit or vegetable juice, two servings of bread or bread alternate or two servings of meat or meat alternate, or one serving of meat/meat alternate and one serving of bread or bread alternate.

The breakfast program is open to all students. The price is 65 cents

for students and 75 cents for staff. Those students who qualify for the free and reduced price meal program may eat free and those approved for reduced price meals will only be charged 30 cents.

Proper nutrition is not just a problem of low income families. Students who go to school without breakfast are often from families with moderate to high incomes

where parents do not take time or do not have the time to prepare a nutritious breakfast at home.

Studies have shown that students who eat breakfast receive nourishment required for proper growth, have higher school attendance, behave better in the classroom, have higher attention spans in class and exhibit improvement in classroom performance.
