A world changing year 1991

Many pages will fill the history books about the events of 1991. It may go down in history as one of the greatest years of change in the twentieth century.

When the Gulf war ended, many thought we were on the brink of world peace. Now, we hear that Iraq may have the hydrogen bomb. Our news has reported the terrible slaughter in what was Yugoslavia. We have seen the Soviet Union long a super power, dismantled and its republics become independent states.

America, many changes have taken place. Our society has reached an all time high in murder and violence. The tragedy in Killeen, Texas where 22

people were slaughtered is a grim reminder of the madness in our society. The economy feels the pain of recession and many have lost their jobs. The interest rates have dropped to a 25 year low.

In the midst of all the problems, there has been good news. Our hostages have all been released from Lebanon. The former Soviet Union and Eastern Europe is open for the Gospel message. In New York's famous Central Park, 250,000 people heard Billy Graham preach the Gospel. This past year, church attendance has reached its highest in a quarter of a century. The unusual year is history and now let us face the future with hope and faith in God.

EXERCISE

From Page 1

combined diet and exercise program, 98% of weight loss is fat - diet alone affords only 75% by comparison. Result? You'll begin looking leaner - lose inches before lost pounds become apparent.

Myth #8: "I find exercise tiring." In smaller amounts, you'll find that exercise is actually invigorating and contributory to an overall sense of well-being. You will experience increased stamina and better health. Not a bad trade-off for a ten minute, twice daily exercise routine.
