Your pet needs  
a family  
doctor too.

Often you may find that routine care-feeding, watering and preventative medicine- proves to be your most difficult task as a pet owner.

But maintaining your pet's health through a routine of yearly tests, vaccinations, and physical exams is very important. A veterinarian can help discover and treat minor problems before they become major expenses. Call us for an appointment-we'd like to become your pet's family doctor.
