Officer Petty on duty in Mediterranean Sea

Navy Petty Officer 1st Class James A. Petty, whose wife, Monica, is the daughter of Mr. and Mrs. E.M. Roberts of 1036

Margrace Road, Kings Mountain, recently departed on a six-month deployment to the Mediterranean Sea aboard the guided missile cruiser USS Normandy.

Petty is one of more than 300 sailors aboard the ship, which departed its homeport of Norfolk, Va., as part of the USs George Washington Battle Group. The battle group is comprised of eight tactical aircraft squadrons, seven surface combatants and two submarines, and is replacing the USS John F. Kennedy Battle Group, which has been deployed since April.

Petty and fellow crew members prepared for the deployment by participating in an Atlantic joint task force exercise off the eastern coast of the United States. The exercise involved more than 15,000 U.S. forces and tested their ability to respond to situations they may encounter during their six-month deployment.

Petty's ship is a multi-mission surface combatant capable of supporting carrier battle groups, amphibious forces, or operating independently. Petty's ship has weapons and sensors that allow it to effectively protect itself and other vessels in the battle group from aircraft, surface ships, or submarine attacks.

The USS George Washington Battle Group can travel more than 500 miles a day while simultaneously deploying to separate geographic regions. With Tomahawk cruise missiles, tactical aircraft and combat-ready Marines, the forces provide unified commanders with an unparalleled range of flexible options and capabilities.

He is a 1977 graduate of Crest High School.

**LOCAL HIGH SCHOOL ATHLETES AGREE.
OUR NATIONAL ATHLETIC TESTING
PROGRAM REALLY KICKS BUTT.**

When the National Athletic Testing Association in Omaha, Nebraska needed someone in the Gaston area to perform on-site testing of local high school athletes, they recruited Gaston Memorial. Our sports medicine group jumped at the opportunity. But soon it was the athletes who were doing the jumping. And sprinting. And stretching. Because the program tests individuals for their power, agility and endurance skills. And during testing, our sports medicine specialists are able to help athletes in ways that can improve performances, and more importantly, reduce injuries. Which is only natural because that's what we do every day at the Rehab and Sports Medicine Center. From simple sprained ankles to the most advanced arthroscopic and reconstructive procedures, we think you'll also agree our sports medicine program kicks gluteus maximus - to use a medical term.

What Occurs If You Suffer A WHIPLASH?

In a whiplash injury, the neck is whipped backwards and rebounds forward suddenly, which may or may not cause pain in the neck along with strains and sprains in the neck muscles.
