Is This What's Causing Your Sciatica, Pinched Nerves or Spinal Stenosis?

If You Suffer From A Single One of These Torturous Symptoms - Numbness, Tingling, or Sharp Nerve Pain - THEN THE FACTS BELOW MAY BE THE MOST IMPORTANT YOU HAVE EVER READ IN YOUR LIFE!

Pain affects every part of your life -- walking, sitting, and even sleeping.

Maybe you've had multiple tests, only to find out no one has any idea what you have. Maybe you've even been put on a drug with heavy side effects.

Do you have any of the following symptoms...

- Sciatica
- Pins and needles feeling
- Numbness in the hands or feet
- Tingling or burning sensations
- Weakness in the arms or legs
- Sharp, burning pains
- Spinal Stenosis
- Sharp pain in the buttocks

Nothing's worse than feeling great mentally, but physically feeling held back from life because your nerve or sciatica pain hurts and it just won't go away!

Fortunately, if you are suffering from any of these problems, they may be relieved or eliminated by non-surgical spinal decompression.

Non-surgical spinal decompression is a technology that has been proven to reverse disc herniations. It creates a vacuum effect on the disc, which pulls the disc back into its normal position and brings in a fresh blood supply to promote healing.

Spinal decompression treatments are very gentle. In fact, every once and awhile I even catch a patient sleeping during sessions.

Will This Really Work?

A medical study found patients

went from moderately painful to almost no pain with decompression treatments. Those that took pain pills improved less than 5%. - Am Society of Anesthesiologist, 2006 Chicago, IL

Another study presented at the American Academy of Pain Management in 2007 showed...

"Patients reported a mean 88.9% improvement in back pain and better function...No patient required any invasive therapies (e.g. epidural injections, surgery)."

These are just two studies out of a dozen done in the last few years, all showing promising results.
