Q. I'm a widow getting monthly social security payments. I have a chance now to do some part-time work. Since I've never had a social security number of my own, should I use the number on my check?

A. No. The number on your check is your late husband's social security number. You should apply for your own social security number. To get one—just call, write, or visit any social security office.

If you lose your social security card, notify any social security office and get a duplicate.

The duplicate card will have the same number on it—your social security number for life.

It assures social security credit for your earnings... credit that can mean monthly checks for you and your family if you become disabled and can't work for a year or more; for your family if you die prematurely; or, later, when you retire. And, of course, Medicare when you're 65 or over.

There are 4,287 extended care facilities participating in Medicare.

What Are WARTS?

Who, as a child, didn't have a wart, or two, or more? You got them by handling toads and frogs. Right? Wrong! That's a slander on the tail-less amphibians. A wart is caused by a viral infection of the outer layer of skin; that is, a wart is a virus-caused growth.

Warts can't be "charmed" away, "witched" away, or washed away in the water found in the hollow of a dead tree stump on a moonless night. Most warts disappear without treatment. If a person wants a wart removed, he should obtain professional treatment from his physician. He MUST obtain such treatment if the growth of the wart continues, or if it burns, "peaks" or bleeds.

When in doubt, see your doctor.
