LETS KEEP THE BALL ROLLING During the year that is now coming to a close, the Negroes in Raleigh have demonstrated a strength and a unity many thought was im-

We are convinced that this great leap forward was due to the Christian leadership manifested here this year. Possibly at no period, during modern times, has the Negro ministry in Raleigh struck out so boldly for the God-ordained rights of their people. It has always been our belief

that this leadership must come from our ministers. The Negro church is our biggest, best organized and most articulate forum. To a remarkable degree, the Negro minister is the spokesman of the Ne-

We recognize the part played ed by lav leaders during this year of action and decision. We feel however, that it was the spiritual spark, ignited by the religious leaders, that keyed our lav leaders to the efforts and attainments achieved by

Now that it has been so amply demonstrated that Raleigh is not a city whose Negroes are satisfied and complacent; now that we are moving in the right direction, lets coon the ball rolling.

We will never allow ourselves to so back into the old rut. We know now that we can only go forward TOGETHER. The inspiration generated by our achievements this vear will inspire us to greater efforts and greater achievements next year. Yes, by all means, "lets ity as exalted ruler, Mr. Haywood kepe the ball rolling." Please.

FIXING THE BLAME

As we look at the shameful turmoil, the heathenish actions of uncontrolled mobs and the ravings and uncivilized raptings southern politicians, all trying to prevent the lawful process of school integration, we are compelled to take a cold, hard backward look. It was in May 1954 when

II S Supreme Court unanimously decreed that segregation in the public schools was unconstitutional Ordinarily, when the high court riles that a law, an act or a practice is unconstitutional, the ruling means that from that date on those things will not be permitted.

For some unexplainable reason, after the court had unanimously declared school segrere unlawful, it delayed for a implementation vesr anv wherehy its decision was to be enforced.

After a year's delay, the Court came un with the hitherto unheard of edict that its school order was to be carried out with "all deliberate speed." To this date, no one has ever agreed on the meaning of "all deliberate speed."

The agonizing aspect of all of this is the bare fact that if public school segregation is illegal, it should be banned, forthwith just as all illegal practices are outlawed when found to be outside the law. Never before has a court found something to be unlawful and then leave it to the perpertrators of this unlawfulness to decide when, if ever, they wanted to stop the unlawful practices.

It is only natural that this stop gan type of decision would have embolded a people, who fought a terrible war in an attempt to keep a race enslaved, to try to strengthen their hold upon their "right" to

maintain school segregation. We believe the Court erred in "buttering" up this decision. We cannot understand why people should be allowed to make up their minds when they want to stop breaking the law. As far as we are concerned, the blame for the savage upheaval over school integrafion, now ruling the south is due to the indefinite, indecisive school interpretation ETAIN ETAOOETA integration mandate of the U.S. Supreme Court.
