The move, while not definite, would make Mrs. Wallace, mother of four, the first woman to seek the chief executive's post in Alabama.

Political observers see in this attempt, a drive to retain the reins of state government while as the same time tackling two obstacles in the way of Wallace's other bid to

## Jury Bias Exclusion

WASHINGTON (NPI) -- The Department of Justice--prodded into action by the exclusion of Negroes from recent civil rights trials in Lowndes (Alabama) County -- has opened fire on the all-white jury system in the South.

The department entered a motion to intervene in a suit previously filed by nine county residents -- six Negroes and three white Episcopalian ministers -- against the county jury commissioners.

The plaintiffs contend Negroes in the Klan-dominated county have been systematically excluded from jury duty.

While the department has no authority to bring suit to stop the exclusion of Negroes from juries, the Civil Rights Act of 1964 gives it the power to join in private cases involving the denial of equal protection

ATLANTA (NPI) - Ku Klux Klan terror and apathy have reportedly combined to keep Negro voter registration in the South down to about 50 percent of predicted figures, in spite of the 1965 Voting Rights act. A survey in the six states

and 26 North Carolina counties affected by the law, shows that about 108,000 Negroes have registered in the 12 weeks since the passage of the law in early

Between 900,000 and one million Negro registration in a year were predicted by Dr. Martin uther King, Jr. Negro leaders. The current pace of 40,000 a month, would amount to 480,000 a year.

Civil rights organizations are encoutering apathy and fear among Negroes, difficulties in shifting civil rights workers from other projects to voters registration drives, and "restrictive" voter registration hours in some Southern states.

mediate withdrawal from combat in Vietnam of all American soldiers less than eighteen years old was again called for by Congressman John Conyers, Jr. (Dem-Michigan) last weekend, "Not sending American soldiers into combat until they are eighteen years old was the policy the Korean War and I think the same policy should also apply in Vietnam," declared Conyers who was decorated for combat service in

Korea as an Army officer. "Quite simply I feel that seventeen is just too young for someone to fight in war, though I admire and respect the courage of the American youths who volunteer at such an early age. Not only should soldiers less than eighteen no longer be ordered into combat, but all those less than eighteen should be immediately be withdrawn from combat. Since the best Defense Department guess-estimate is that presently there are no more than 1200 seventeen year olds in Vietnam, I feel confident this can be done without endangering the safety of the individual

September when constituents complained to him that they had been misled by Marine Corps recruiters into believing that their sons would not be sent into combat until they were eighteen and so had allowed their sons to volunteer. Current Federal Law allows seventeen year olds to volunteer only with the signed parental permission. "As a result of these hundreds of protests from Detroft parents, we were able to get the Marine Corps to immediate issue an order to all their recruiters reemphasizing that the Korean War policy preventing seventeen year olds from going into combat did not now apply to Vietnam," declared Congressman Conyers,
