## BURL ALLEN'S INK TONGUE

Almighty Raleigh, being the capital of our most prosperous Southern State, and being so engaged in so many projects of urban renewal, please answer your humble citizen's request by leading cities in improving small Negro businesses -- that is, to serve Negro settlements.

First of all, O Raleigh, many of these concerns -- owned and operated by Negroes and Caucasians -- are just ratty shacks that need to be not repaired, but replaced! Lots of these places are not only untidy, they are also unsanitary

and unaccommodating -- serving both sexes with one sub-standard restroom!

Since these shop owners and operators, without self respect, do not respect us who bring them the only things that they do respect--our almighty dollars--O cultural Raleigh, please teach us to direct our dollars to show the misers that the only profiting kind of little business is big little business, and because little little business makes little of all its patrons--and even more of itself!

And now, amen, Raleigh, amen.

**FIVE COMMON EMERGENCIES YOU SHOULD KNOW:**

1. Falls: If there is continued pain or a possibility of a broken bone, don't move the victim unless it's absolutely necessary. Keep the injured person warm and comfortable.

2. Unconsciousness: Unless obviously a simple fainting spell, this may be a major emergency. Get a doctor at once. Turn the patient on his side. Make sure breathing isn't obstructed. Keep him warm. If breathing stops, give rescue breathing.

3. Burns: If severe, apply wet sterile compresses or pieces of a freshly laundered sheet. Do not break blisters. Never clean the burned area. Get the patient to a doctor or a hospital as quickly as possible.

4. Animal Bites: Wash the wound promptly and thoroughly with soap under running water. Apply sterile bandage and take the victim to a doctor. Have the animal caught alive for rabies tests. The doctor will notify you if anti-rabies treatment is needed.

5. Poisoning: Start first aid at once. If possible, one person should begin treatment while another calls a physician. If the victim is conscious and there are no burns or stains of the mouth and lips--place your finger at the back of the patient's throat to induce vomiting. Give the patient milk. Save the poison container for the doctor.

Be sure to check your supplies. Keep the following fresh and handy: Absorbent cotton, adhesive tape and bandages, petroleum jelly, or mild burn ointment, antiseptic, aromatic spirit of ammonia, scissors and tweezers.
