Negroes Are Jobless, NUL Tells Sen. 'Ted' Kennedy

Sen. Edward M. Kennedy (D.-Mass.) has come under the fire of the National Urban League for his proposal that the United States allow more workers to come here from abroad.

"It is uneconomical and immoral to keep Negro and other minority workers unemployed or pushing brooms while making a strong re-cruitment effort 5,000 miles away." Adolph Holmes, League associate director of economic development, asserted in a letter to Sen. Kennedy.

WEATHER

In his letter, Holmes said

Temperatures for the next five days, Thursday through Monday, will average two to six degrees below normal. Normal high and low temperatures will be 83 and 62 degrees. It will be rether cool grees. It will be rather cool during the first part of the period, but warmer weather will prevail about Sunday and Monday. Precipitation will to-tal one-half to three-fourths of one inch or more, occurring as rain early in the period, and as showers at the end of it.

League) are seriously concerned with your proposal . . . which will ease the Immigration and Nationality Act and make it possible for persons from abroad to come into the country for jobs such as parking lot attendants, clerks, waiters, sales clerks, typists, truck drivers, housekeepers, and launderers . . .

"We can't understand why those companies are willing to spend the money and the effort to bring a man 5,000 this country for a job, while there is a source of willing labor right in their own back yard.

"The labor market may be a tight one for white workers. but Negro unemployment is still around the 8 per cent mark and shows no sign of declining.'

"The money and energies used to attract freign workers should go into training programs for unemployed and under-employed Negro workers," Holmes said.

"Business must start at home and open its doors to

Arson-Minded Negro Dangerous!

Guest Editorial BY GORDON B. HANCOCK

The violent Negro's appeal to fire is one of the ugliest and most dangerous symptoms of the current interracial disorders. The arson-minded Negro must be crushed and curbed in the interest of the national safety and Negro survival. It is high time for leaders of the race to rise up against arson-minded Negroes and condemn them in no uncertain terms. Arson is a threat to everybody, friends as well as enemies, whites as well as Negroes, the "haves" as well as the "havenots." Arsonists have no friends anywhere; and if there is a certain means of driving away every last friend of the Negro everywhere, arson is that means. If there is a sure way to consolidate the white race against the Negro race, arson is that way. Arson is dangerous and so is the arsonist and the sooner arsonism as an ideology is stamped out among rioting Negroes, the better for Negroes and everybody. The Negro who thinks that by applying the torch the twenty million Negroes can bring nearly 200,000,000 whites to their knees is a fool! And the Negro leaders who inculcate such notion in the unthinking Negro masses are knaves, and as such should be denounced; for they are inviting social and economic damnation upon the heads of the Negro millions. There is an overt anti-Negro element among whites who are abetted by millions of covert anti-Negro elements who are seeking and searching for an excuse to destroy the Negro for his very attempt to pull into the mainstream of American citizenship. We have made startling advances since 1954 and the sentiment of the world has been going for us, but it is quite conceivable that the Negro arsonist can turn the stream of world sentiment against us in our just struggle for full citizenship. The Negro arsonist must be crushed or by his senseless appeal to fire he will crush the aspirations of a struggling people. The Negro leaders who are inclined to go slow on the denunciation of the arsonminded Negro may live to regret it. The violence that has been injected into a

non-violent adventure is unfortunate

enough, but for this violence to take the form of arson is a form of racial suicide.

There are many anti-Negro organizations in this country founded by the anti-Negro whites, covert and overt. It hardly takes a prophet to see what is possible when these organizations consolidate and integrate. There is no surer means of hastening this consolidation and integration of the anti-Negro elements than the arsonist so evident in the current interracial disurbances. There can be but little doubt that someone in the role of leadership is putting arson in the minds of these crude arsonists who appear too invariably in the riot zones. The leader or would-be-leader planting the arson suggestion is doing a damnable thing. It is high time that our pulpit and press cry out with a loud voice against the would-be Negro arsonist. People with homes and possessions are against arson and only the shiftless and irresponsible would resort to such specious means of trying to outsmart the white man. It cannot be done and the sooner the word is passed along that it cannot be done the sooner will our arson-minded Negroes be checked. Arson is dangerous for everybody everywhere and all the time! Arson-mindedness must be stamped out and the sooner the better! The toe-hold that Virginia gave the Nazis a few years ago has become a foot-hold already; and already the Nazis though weak in numbers to date, are crying for Negro extermination; and nothing could give their anti-Negro battle-cry force and power more effectively than the arson-minded Negro. Quite as alarming as the adventure into arsonism and the appeal to fire is the silence of the Negro leaders on the horrible implications of arson. What the young Negro would-be arsonist is doing is explained by his leaderlessness. And although desperate now in his plight, he needs leaders who are courageous enough to disabuse his mind of the futility of an appeal to fire and flame. In a fight with fire, the odds are against the Negro and overwhelmingly with the dominant white man. The arson-minded Negro is dangerous!
