

1877 — 90 YEARS OF SERVICE TO EDUCATION — 1967

Representative Members Of Fayetteville State's Alumni Ass'n.

The value of a college to a community, a state, or a nation is measured by the contribution its students and graduates make to humanity. A college's worth is not measured by the pay checks received by its faculty, the big automobile bought by its graduates or the fashionable parties staged at a country club or the poker games in a basement.

Fayetteville State College's ninety years of training students in the art of serving people, is best told in its students and graduates, who have gone forth as builders of character and goodwill, in a world, groping in wanton dismay, utter disappointment, greed and gain. In a world whose yardstick of success is not how much I can get at the expense of my brother.

The motto of Fayetteville State College is the same as that of the state, "Esse quam videri," to be rather than to seem. From Cicero Harris to Rudolph Jones, its presidents have held high the ideal of service to mankind, in the hope that those who passed thru its portals would go forth, forgetting themselves and looking forward to implementing the cause of service, by giving of themselves that others might become more useful, in making the community, the state, the nation and the world better, by having sojourned at Fayetteville State.

The students and graduates of Fayetteville State have gone

forth into practically every phase of human endeavor and made their contribution. Most of them have gone into the classroom. Many have chosen other professions, but the roster of successful people in Fayetteville, and the United States, is filled with former students and graduates of the college, who have spent themselves in trying to make the world better. Listed on this page is a group of such persons who have done outstanding jobs in their respective fields.

The prominent image of the Alumni Association is Brooklyn McGeany, who has been treasurer of the organization for the past 14 years. He received his bachelor's degree from the college and has done further study at Howard University, North Carolina College, Atlanta University and got his master's degree from NYU.

Mr. McGeany is a native of Fayetteville and came from the ranks. He has been quite active in civic, religion, political and educational matters, in the area, for a number of years.

He has served as a principal in the North Carolina School System, in Rocky Mount and Scotland Neck. He was a member of the faculty of Newbold Training School and it was there he exhibited his ability as a judge of potential teachers. He is currently supervisor of student Teachings, at the college, and assistant professor of Ed-

ucation. He is married to the former Alice Greene of Morehead City. They have one son, Eric, who is a sophomore at Morehouse College of Atlanta. He is a member of the Association of High Education, ASCD, AST, NEA, NCTA, a Mason, A Shriner, and an Elk.

Mr. McGeany has given unstinted service to the Alumni Association and has been responsible for Founder's Day and the Alumni Day program for several years.

MRS. ROXIE FOWLER
One of the most outstanding members of the Alumni Association is Mrs. Roxie Fowler, 4225 Meade St., N. E., Washington, D. C., whose endeavors have created an image in the nation's capital for Fayetteville State College that is the envy of many.

Mrs. Fowler is one of the founders of the D. C. Chapter, which was organized by Attorney J. C. Newton and Alexander Barnes, in the 12th St. Y.M.C.A., in 1932. The organization has worked zealously for the college and has sponsored many efforts that have resulted in raising money for scholarships.

Mrs. Fowler attended, in the early twenties, when the school was known as Fayetteville State Normal, and she expressed her appreciation for the opportunity, in accepting the honor as "Miss Alumni" in 1967, by saying:

NCTA Will Sponsor Joint State Workshop

The North Carolina Teachers Association will sponsor a Joint State Workshop on Professional Rights and Responsibilities Legislation, Saturday, Feb. 25,

from 10 a. m. until 3 p. m. in University Chapel, Shaw University. The theme for the workshop is "Raising the Standards of the Teaching Profession."

Lecture Series Set At ECSC

ELIZABETH CITY - Elizabeth City State College Physical Science and Mathematics departments invite all area public schools, colleges, and interested persons and organizations to attend their Fourth Annual Lecture Series Feb. 14-15. This year's series is conducted by Dr. Moddie D. Taylor, author and professor of chemistry at Howard University.

James H. Towns, assistant chemistry professor stated "The purpose of this lecture series is to have noted scientists and mathematicians share with us recent developments in the realms of science and mathematics and the new patterns utilized in studying their discipline in our modern times."

The lecture series, under the sponsorship of the Division of Chemical Education of the American Chemical Society, will consist of three topics: Predicting physical and chemical properties and reactions from electronic structure; The infrared structure and spectra of the rare earth benzoates; and Science, the fourth dimension of culture.

Principal participants will be Mr. Jasper L. Lewis, superintendent of schools, Cherryville; and Dr. Marion Thorpe, assistant director of the Board of Higher Education of North Carolina. Two general sessions and two group sessions will be conducted.

Group One will explore the topic "Does Desegregation Raise the Standards of the Teaching Profession?" Group Two will explore the topic "Do the Recent State Guidelines for Teacher Training Raise the Standards of Teachers?"

Participants in the Second General Session will acquaint themselves with "What North Carolina Specifically is Doing to Raise the Standards of the Teaching Profession."

Mrs. Henrietta Hatt on, is chairman, State Professional Rights and Responsibilities Commission, Dr. F. G. Shipman is chairman of the State Legislative Committee.

Observation of subcellular functions by the electron microscope is providing basic and exciting results in medical research at the Veterans Administration hospital in Washington, D. C.

Fayetteville State Leads The Way To Higher Education Goals

There were those who feared for the future of Fayetteville State College when President Rudolph Jones warned state officials that the schools were turning out idiots as graduates, and they were being trained by idiots, however the results have been just the reverse. It appears that this statement caused the officials to take a closer look at the system, especially where predominantly Negro colleges were concerned.

The accelerated program in most of them has been noticed, but Fayetteville seems to have moved out ahead. It recently dedicated three new buildings and the third is now being built and it is believed that contracts will be let for more in the very near future. The new library is expected to be ready for occupancy by the first of the summer.

The recently dedicated buildings met a great need and added greatly to the physical capabilities of the plant.

The Dunie A. Bryant Hall is a residence for 300 young women. The building has 40,075 square feet of space and is constructed in two three-story units with connecting breezeways at each level.

The main floor north wing has a beautiful appointed lounge which can be converted by the use of folding dividers into three small rooms. There are facilities for preparing snacks and refreshments in a room adjoining the lounge.

Each floor has a laundry room, trunk room, adequate bath facilities, and a study hall. The second and third floors have rooms for hair care. There is a parking system which allows for communication to each floor and each wing separately if desired.

The furniture, except for chairs, is in the bedrooms is built in and provides for each student a wardrobe, chest of drawers, desk and book shelves, and bed. Custom made drapes throughout and attractiveness and uniformity to the appearance of the building.

The variety of wall coloring which contributes to the home-like atmosphere of the residence hall. Each of the two residence hall directors has a two-room and bath apartment.

EMIL ROSENTHAL CLASSROOM BUILDING
The Emil Rosenthal Classroom Building was completed in June, 1966. It is a two-story air conditioned brick and steel structure, containing an area of 25,000 square feet.

This classroom building consists of a first floor, main floor, and hexagonal area with a main entrance. The first floor contains two classrooms for art with a capacity for approximately 40 students, a dark room for developing pictures, a student lounge, and a multipurpose room.

The main floor above the first floor contains three classrooms, an art studio with facilities for 40 students, a listening and reading room, faculty lounge, and six faculty offices. The hexagonal area of the main floor is designed for music. The choir and band rooms with a capacity for 125 students are surrounded by practice rooms, offices, storage facilities.

control room, laundry, and janitor's room.

The assistant director is housed in a second floor apartment. A study hall and a trunk room are located on the second and third floors of this residence hall.

The Vance dormitory perpetuates the name of the second oldest building on the campus, which was built in 1910 and demolished in 1957.
