

Shaw To Host Peterson Dance Co. March 7-10

Shaw University will present the Stanza Peterson Dance Theatre in the production "Faint Whispers In a Lonesome Wood" in the Greenleaf Auditorium on Friday, March 7 -- Monday, March 10, at 8:00 p.m. Peterson, the director-choreographer of the group, has worked with leading innovators in Modern Dance. He has danced in the companies of Charles Weidman, Syvilla Fort, Eve Gentry, Edith Stephen, and Gloria Contreras, the leading contemporary choreographer in Mexico. Prior to the organization of his own company, he worked as a dance specialist for the Board of Education of New York City. He has also been dance consultant and artist in residence at several colleges.

"Faint Whispers In a Lonesome Wood" is a tribute to Black American Artists in the fields of poetry, literature, and music. In the production, such poets and established artists as Langston Hughes, Gwendolyn Brooks, LeRoi Jones, and others are represented. Dance works are choreographed to compositions of Duke Ellington, Howard Swanson, Sun Ra, Tommy Dorsey, and Quincy Jones, who is presently nominated for a Holloywood "Oscar" for his musical score in the movie, "In Cold Blood."

The program is educational as well as entertaining and is in three parts; a full length theatre piece, and is brilliantly acted and danced by the members of the company. "Faint Whispers In a Lonesome Wood," after a pictorial history of the Afro-American in dance and traditional music, then takes up its narrative in 1770 with the earliest recording of American Negro history, the bloody Boston Massacre where Crispus Attucks became the first Black soldier to fall for American Liberty. The narrative then confines itself to the cultural aspects of the Black American poetry, literature, and music, then continues with our present artists who are contributing to everything American.

Gatorade Makes Popular Debut

Indianapolis—(HK)—Gatorade, the unique thirst quencher that has revolutionized the drinking habits of athletes during the last 18 months, will become a common household beverage early this year.

Stokely-Van Camp, Inc., said the non-carbonated lemon-lime flavored beverage which is absorbed faster than water will go into retail distribution beginning in April throughout the southern portion of the nation and in Hawaii.

By June, said President Alfred J. Stokely, food stores in most of the country will have been stocked with 32-ounce glass de-canisters selling at retail for about 39 cents.

Gatorade is the first isotonic food beverage; that is, it is formulated for quick absorption by the body. This quality permits active people to drink the product at will even during strenuous exercise.
