NC's Robert Brown May Leave White House Post; Cites Money

Robert Brown, who was the first black man to wear the title, "Special Assistant to the President," is finding out that the title is not as rewarding financially as it is otherwise.

Brown went to the White House with the intentions of staying at least two years. One year has already passed, but Brown is doubtful about the sec-

ond. "I hope I can," he said, "but holding this job has proved to be a financial burden."

"When you take a \$20,000 cut in income, it sort of rearranges

your thinking", said Brown, who conducted a highly successful public relations business in High Point, N. C. before going to Washington. There hasn't been a month my wife and myself haven't had to top the savings account.

Brown who spends his time working with various civil rights and minority enterprise problems makes no bone that his complaint is one of finance only. "This job has been rewarding in many ways," he explained "and the President is a fantastic man, beautiful to work for." (See BROWN MAY, P. 2)
