

Your Weekly Horoscope

October 2 through October 8, 1971

ARIES (March 21-April 19): Accent on joint projects with partner/mate. Establish firm rapport. Read between the lines. Pace yourself, and even if track appears muddy you wind up in winner's circle. After main event, sneak away together and celebrate. Bon voyage, baby.

TAURUS (April 20-May 20): Knowledge is not the most important thing in the world, Taurus. In week ahead, be silent and let your deeds speak for you. One whom you seek to understand is like the dark side of the Moon. Mysterious, and perhaps not worth all the energy you are expending. Think about it.

GEMINI (May 21-June 20): Pack your survival kit, Gem. You'll need it before fifth day. Pisces individual could drive you to distraction. Plan your get-away with great care. And for the love of Heaven, DON'T leave a trail of breadcrumbs.

CANCER (June 21-July 22): You must learn to trust, Moonbaby. What you're fussing and fidgeting about is not apt to happen after all. Week could be a winner, if you just have a little faith. And stop grousing about past injustices.

LEO (July 23-August 22): You may feel like a taxi trapped in a tunnel in days ahead, Leo. If so, have a heart and turn off your meter. After all, your passenger can't very well run away, you know. By fourth day, traffic begins to move and end of week finds you out in the brisk October air once again.

VIRGO (August 23-September 22): Temptation to probe in area which is not in your domain could prove disastrous, Virg. You know what curiosity did to the pussycat, pet. Unless of course, you intend to write a screen play. In which case, you'd be wise to entitle it "I Am Curious (Black and Blue)."

LIBRA (September 23-October 22): A row is in the wind, Lib. It will involve an aggravating Aquari. Boredom is no doubt the real villain. Use energy to zero in on pet project and you will be less peevish. If possible, get away from routine. Throw your duds in a flea bag and join those who operate on same frequency.

SCORPIO (October 23-November 21): Energy

remains high. Live each day to the fullest. Long overdue invitation arrives. Don't shilly-shally about accepting. Your thirst for life is slaked. Finally.

SAGITTARIUS (November 22-December 21): Your penchant for chance-taking will be unusually strong, Sag. So let your spirit dance. The rhythm of the universe surrounds you. Just hang loose and let life, like a giant wave, carry you to friendly shores.

CAPRICORN (December 22-January 19): Expect to hear from a Good-Time-Gem before end of third day. This doll will present proposition which you would do well to ponder. As week wanes, you are reminded of long-forgotten promise. And a promise made is a debt unpaid, Cap. So unlock your money belt and cough up.

AQUARIUS (January 20-February 18): Aquari, Olga would like to pose a very personal question. Are you following a life-style to impress others, or because it truly suits you? Think before you answer. If answer is the latter, then week ahead is ideal to make dramatic changes.

PISCES (February 19-March 20): Dear, gentle Pisces, days ahead are for you to gather in your personal harvest. Partner/mate is most amenable to suggestion. Career plans bear fruit. Unseen forces are positive and you wind up the week squealing with delight.
