140 REPORT TO BE PRESENTED

A final report on the economic impact of the section of Interstate 40 that stretches from Raleigh to Wilmington was presented to the 1-40 Economic Impact Steering Committee on Wednesday, Nov. 6, at the Wilmington Hilton at 5 p.m. Gov. James G. Martin addressed the committee.

Dr. David Hartgen, professor and coordinator of transportation studies at UNC-Charlotte, presented findings of the \$140,000 study that began in October 1989 to assess the highway's economic impact on the communities through which it passes.

There is no minimum loan and the maximum loan depends on the borrower's income and what he orshe can afford. Mortgage lucus may be paid off over 10 to 30 years.

Relaxed qualifications permit a borrower's ratios of house payment to income and total debt to income to be as high as 45 percent if the total debt to income is not greater than 110 percent of all obligations satisfactorily managed in the last 12 months.

Co-borrowers will be considered as long as the co-borrower makes his or her primary residence in the mortgage premises or is an immediate family member. Income from duplexes or boarders also will be considered.

In place of traditional methods, ability to repay the loan will be judged on income from wages. dividends. interest. child support/alimony, notes receivable, retirement, Social Security, military pay, income from public assistance. food stamps, trust income and other sources

Prohibitive origination fees have been removed. A relaxation of cash reserve requirements is designed to ease the burden of providing up-front cash to close.

This product represents a "new look" at credit history. A borrower must demonstrate willingness to repay the debt; however, any borrower with past credit problems who has demonstrated responsible credit management during the most recent 12 months will be considered favorably. Extenuating circumstances relating to previous credit problems will be taken into consideration.

A previous bankruptcy will not disqualify a borrower if it has been discharged for at least two years and the borrower has demonstrated the ability to manage his or her financial affairs.

A prospective borrower will not be declined for lack of established credit if he or she can show satisfactory payment of rent, utility and telephone bills for the past 12 months.

The new product will be integrated with NCNB's previously announced commitment to work with community groups on projects that will offer a full range of credit counseling services.

Credit counseling is required and must be documented. NationsBank will work with community-based organizations to ensure that they continue to be actively involved in the counseling process. A list of acceptable counseling services will be available. Counseling services not listed will be considered on a case-bycase basis.

Borrowers who recently have moved from public assistance to employment will be viewed favorably if their employer can verify the job likely will continue to exist for at least 12 months.

The property's foundation and structure must be judged acceptable. be safe and have a satisfactory rating for plumbing, electrical wiring and condition of improvements.

'We intend to promote and market the Community Investment Mortgage product aggressively," Bessant said.

AWAITING A NEW HOME-Tasha and Rodney are two very special and very sweet youngsters who need a permanent adoptive family. Rodney, born March 1985, is an active little guy. He is small for his age and good-looking with serious, dark brown eyes and a shy smile. Little sister Tasha, born September 1986, is petite and pretty. Tasha is a busy little girl who enjoys being on the go. Adoptive parents can be married or single and can be working outside of the home. For more information, call Tina Martin at 856-7474.

In rejecting the proposal, Dr. Wentz said, "After reading the statement of concern submitted to me on Oct. 4, I find it difficult to respond because + of a fundamental disagreement with the description of concerns, which I' feel are an overstatement of reality. The narrow descriptors would not find overwhelming endorsement by the majority of parents, faculty, nor students. Therefore, I do not concur with most of the proposals for immediate action.

Now that we are all very well-informed and have top-notch fashion sense with super saving tips, we need to now be aware of the sizing. Most of us ca say that we wear one size in this and another size in that and th change according to the manufacturer. The following specifications will help you to get a better picture of where youf it in the "General Sizing Classifications" Classifications.

Junior: Sizes 3-15. For short-waisted women 5'2" to 5'6" tall. Often this type of figure has a larger waist (when compared to Misses' sizes). Age has nothing to do with junior sizing.

Junior Petite: Sizes 3P to 13P for women 5'2" and under with figures similar to the junior figure.

Misses: Sizes 4-20. These are sizes for women 5'4" to 5'9" tall with normal to lowish waistlines and a slim to medium-full figure.

Tall: Sizes 8-20 for those women who are 5'9" or taller. Half sizes: Sizes 121/2-241/2. These sizes are for short-waisted fuller wo who are 5'6" and under.

This guideline is very standard so you may find variations in some specialty stores or departments. As a general rule, the more expe clothes are cut closer to the guideline.

Just for your information, there are four general figure types. The Perfect Figure: This figure has the bust and hip measure arements the same, with the waist 10 inches smaller. The weight must be in proportion to the height.

The Average Figure: This figure may have the bust and bip measurement one inch out of proportion. To have this type of figure, you weight can only be five pounds under or overweight.

The Problem Figure: Any figure which does not meet the a escription is considered to be a problem figure.

The Model's Figure: Bust and hip measurements the same, with the vaist 12 inches smaller and 10 pounds underweight.

Where do you fit? Don't fret if you are in the "problem figure" class because the majority of us are. The challenge we are trying to overcome through this column is to create teh image of perfection. This can be echieved with dedication and the reading of this column, of course (smile). As Lasid in the very beginning, feeling comfortable in the way we look affects how we function daily. When you "know" you're looking good and get nods of approval, it adds a little bounce in your step and keeps you shining throughout the day.

Again, for your information, most of the beautiful women in and on television have a lot of help in achieving the look of the ideal fashie figure. How many of them do you think fit this criterion? **Ideal Fashion Figure.**

- 1. Shoulders are three times as wide as the head.
- 2. Hips are not as broad as the shoulders.
- 3. Bust and hips are the same circumference.
- 4. Waistline is 10 inches smaller than the hips.
- 5. Waistline is located about three head-lengths from the top of the head.

6. The distance from the waist to the ground is equal to five head lengths Now that we are all clear on where we fit, we can continue to enhance ou

Did you see Tuesday's (Oc-tober 25th) papers talking 'bout the civil rights bill, and how Bush supposedly compromised to pass one almost identical to the one already proposed?
