**TAR HEEL FARMING IS BIG!**

With about one-third of North Carolina's population interested in agriculture, it is interesting to note that their 290,000 farms had a cash income of \$955 million in 1951. This amount equals the total income of 380,000 fully employed average textile workers! The ever-increasing farm income in our state goes far in helping to make North Carolina a better place in which to work, play and live for all of us.

Another contributing factor to more pleasant living for North Carolinians is the brewing industry's self-regulation program where brewers, wholesalers and retailers—in counties where malt beverage sales are permitted under State control—cooperate to maintain wholesome conditions for the legal sale of beer and ale.
