FACES A CHALLENGING FUTURE

Travel is a big "industry" in our State. It benefits all areas directly or indirectly. Of the several hundred million dollars spent on travel and at resorts in North Carolina, nearly all is taxable to the State. Our opportunity to develop this growing business is limited only by our hospitality. We already have the attractions and facilities, of which our own people are perhaps the biggest users. Our future is unlimited.

One of the most important contributions to our hospitality in most areas is our county-wide "legal control" system of the sale of beer and ale—a system that is working exceedingly well in the interests of all engaged in the travel business, as well as those law-abiding communities that subscribe to it.
